PHILIPS

Additional handset for cordless phone
2000-series Glossy White

CD2850W/38

Highlights

MySound

Sound perception is subjective and everyone has their individual listening preference, therefore MySound provides you with three distinctly different profiles in your choice of sound to give you the ultimate listening experience: Clear - for making the voices very crisp and clear Soft - for a more friendly and soft voice Warm - for making the voice sound welcoming and warm.

Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Low power consumption:< 0.65 W

Philips phones are energy efficient and are designed to be respectful to the environment. Now the power consumed in stand-by mode is less than < 0.65 W.

100-name phonebook

Always have the phone numbers of your loved ones available: Save up to 100 names in your phonebook.

Caller ID- see who is calling

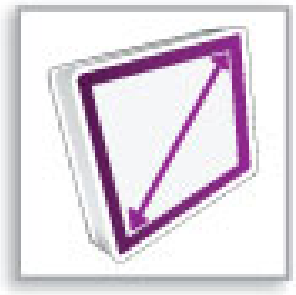

Caller ID- see who is calling

Up to 17 hrs talk time

Up to 17 hrs talk time

4.6cm (1.8") amber-lit display

4.57 cm (1.8") display with amber backlight

EcoMode: reduced transmission

Since the base station recognizes when the handset is docked on ist base, an intelligent embedded system ensures transmitted power is permanently controlled and optimised according to the distance between handset and base unit. It means power emission is automatically reduced by up to 93% when the handset is near its base. When used in Eco Mode, you'll also enjoy a 60% manual reduction of emitted power.
