STYLISTIC Q555

Fiche produit : http://fr.fujitsu.com/stylistic

La tablette STYLISTIC Q555 de FUJITSU offre une productivité complète aux personnes très mobilisées travaillant en entreprise ou dans la fonction publique. Elle représente le compagnon idéal, avec son faible poids de 655 g, son profil ultra -fin, ses 10 heures d'autonomie et sa conception 2 en 1 avec clavier amovible. L'écran mat WUXGA en verre renforcé de 25,7 cm (10,1") lumineux prend en charge la saisie au stylet pour les flux de travail numériques. La connectivité NFC et 4G/LTE nouvelle génération vous permet de rester connecté en permanence et de bénéficier de modes d'authentification et de partage des données avant-gardistes.

STYLISTIC Q665

Fiche produit : http://fr.fujitsu.com/stylistic

La tablette FUJITSU STYLISTIC Q665 deux en un est le compromis parfait entre performances et mobilité. Compacte, sans ventilateur, avec un écran mat en verre renforcé de 29,5 cm (11,6 pouces), elle est parfaitement adaptée à une utilisation intensive et au travail nomade. Vous êtes libre d'effectuer vos saisies avec l'écran tactile, le stylet ou le clavier pour gé rer vos tâches professionnelles plus efficacement, comme vous en avez envie. Pour une productivité sans faille, elle offre les performances d'un ordinateur Ultrabook™, une autonomie d'une journée complète et la connectivité 4G/LTE en option, ainsi que des options de sécurité professionnelles pour garantir la sécurité de vos données. Le clavier amovible et le socle augmentent l'ergonomie.

STYLISTIC V535

Fiche produit : http://fr.fujitsu.com/stylistic

La tablette STYLISTIC V535 de FUJITSU assure des niveaux inédits de productivité dans des contextes industriels. Elle est conçue pour les environnements difficiles grâce à sa résistance à l'eau et à la poussière, à sa légèreté, ainsi qu'à son écran de 21.0 cm (8,3 pouces) en verre renforcé. Grâce aux options exceptionnelles de connectivité et de navigation, notamment 4G/LTE, NFC, GPS et GLONASS, ainsi qu'à l'autonomie longue durée de la batterie, vous pouvez rester connecté où que vous soyez. Intégration simplifiée et sécurité optimale avec Windows 8.1 et TPM. Le concept Smart Shell de Fujitsu permet une adaptation parfaite aux exigences industrielles spécifiques.

LIFEBOOK T725

Fiche produits: http://fr.fujitsu.com/lifebook

Le FUJITSU LIFEBOOK T725 offre un mélange parfait entre polyvalence et mobilité. Son panneau LED HD de 31,8cm prend en charge les saisies au stylet et au doigt, et il est équipé d'un boîtier testé MIL-STD résistant. Le concept de baie modulaire permet de faire évoluer l'appareil avec un lecteur de disque optique, une seconde batterie ou un second disque dur. La 4G/LTE optionnelle vous permet de bénéficier d'une connectivité fiable et les fonctions de sécurité professionnelles protègent vos données. Le réplicateur de ports en option offre, quant à lui, un confort exceptionnel au bureau..

ESPRIMO P420 & P520 & P720 & P910 & P920

Fiches produit : http://fr.fujitsu.com/esprimo

Les PC ESPRIMO P de Fujitsu vous offrent le meilleur en termes d'administration, de performances et d'évolutivité. Grâce à l'efficacité de 96 % de l'alimentation, vous allez également réaliser des économies sur les factures d'électricité. L'utilisation de composants identiques au sein de la gamme de produits offre une parfaite compatibilité avec votre infrastructure. Lors de la mise hors service de votre matériel, l'option EraseDisk, unique en son genre, supprime vos données en toute sécurité.

CELSIUS J550

Fiches produit : http://fr.fujitsu.com/celsius

Si vous avez besoin d'une station de travail compacte mais puissante, le modèle Fujitsu CELSIUS J550 est le choix d'entrée de gamme idéal pour la 3D, la CAO, les applications financières ainsi que pour l'industrie des soins de santé. Grâce à sa conception innovante d'un volume de 10 litres, la petite station de travail CELSIUS J550 est la première à prendre en charge les cartes graphiques de hauteur standard.

FUTRO

Fiches produit : http://fr.fujitsu.com/futro

La gamme de FUTRO de Fujitsu sont des clients légers rentables et faciles d'utilisation, pour des solutions informatiques hautement sécurisées de type client-serveur ou virtualisation du poste de travail. Votre coût total de possession est réduit jusqu'à 80 % par rapport à un parc de PCs standards, cela grâce à un matériel peu onéreux, une efficacité énergétique optimale et un minimum. L'encombrement réduit de nos clients légers et leur fonctionnement silencieux aident à créer un environnement de travail agréable. Enfin, la qualité de nos produits leur une durée de vie incroyable.

Imprimantes

Les imprimantes matricielles de FUJITSU sont le choix idéal pour les tâches d'impression intensives, par exemple pour les factures, les bons de commande, la correspondance et autres travaux en plusieurs exemplaires. Ces imprimantes à plat utilise plusieurs chemins de papier. Elle constitue l'outil idéal pour toutes les applications nécessitant des copies carbone et sans carbone. En plus de ses excellentes fonctions de gestion du papier, ces imprimantes matricielles offre une vitesse d'impression élevée.

CELVIN NAS Server

La gamme de serveurs FUJITSU CELVIN® NAS est une gamme de serveurs NAS tout-en-un haute performance. Le serveur NAS CELVIN® Q802 est la solution idéale pour le partage de fichiers, les options de sauvegarde de bout en bout et l'intégration SAN (Storage Area Network) pour les PME. Il permet en effet de gérer les données de façon centralisée pour un coût raisonnable.

Positionnement serveurs tour PRIMERGY

PRIMERGY TX1310

Vous recherchez un système silencieux, écoénergétique et offrant les performances d'un serveur au prix d'un PC ? Le PRIMERGY TX1310 est le système le mieux adapté à votre entreprise. Grâce à son niveau sonore particulièrement faible, le PRIMERGY TX1310 est le système idéal pour tous les environnements bureautiques. Les composants certifiés serveur sont la garantie d'une fiabilité permanente..

PRIMERGY TX1320

Le serveur PRIMERGY TX1320 de FUJITSU est conçu pour les environnements où l'espace, les fonctionnalités et le fonctionnement silencieux sont déterminants. Ce serveur tour ultra-compact est idéal pour les bureaux, les filiales ou les domaines où des régulations juridiques strictes sont en place, notamment dans les services médicaux, juridiques ou financiers. Avec ses fonctionnalités de serveur complètes, ce système s'intègre facilement aux infrastructures informatiques existantes ou peut être géré à distance. Malgré sa taille, le serveur PRIMERGY TX1320 offre les performances de la gamme Intel® Xeon® E3, jusqu'à quatre disques de stockage et la possibilité de prendre en charge un périphérique de sauvegarde en option. Cette combinaison unique en fait le serveur idéal pour tous les environnements exigeants où l'espace est limité. .

PRIMERGY TX1330

Le PRIMERGY TX1330 est un serveur économique et fiable pour les petites et moyennes entreprises (PME) ou les filiales. Il propose les meilleures performances de la gamme Intel® Xeon® E3 et une grande évolutivité grâce à ses disques de stockage hot-plug. L'alimentation redondante en option et le choix de plusieurs contrôleurs RAID garantissent une disponibilité et une sécurité accrues. Son châssis compact et son niveau de bruit extrêmement faible en font le serveur idéal pour les environnements de bureau ou les lieux d'exposition, où il pourra être positionné sous un bureau. La prise en charge des adaptateurs PCI hérités fait du PRIMERGY TX1330 le serveur idéal pour les solutions spécifiques, notamment les systèmes de téléphonie ou de sécurité. De plus, la suite logicielle ServerView® de Fujitsu offre une assistance aux administrateurs lors de l'installation, du déploiement et de l'administration du serveur. Le PRIMERGY TX1330 : un excellent investissement sur le long terme.

PRIMERGY TX150 S8

Le PRIMERGY TX150 S8 le système idéal pour les petites et moyennes entreprises, les infrastructures décentralisées et les environnements virtualisés. Les besoins futurs sont parfaitement couverts par les 5 slots d'extension PCIe Gen 2/3, la mémoire jusqu'à 96 Go et le stockage avec jusqu'à 16 disques durs. Le concept breveté Cool-safe™ de Fujitsu associé aux familles de processeurs Intel® Xeon® E5-1400 et E5-2400 garantit la meilleure efficience écoénergétique. Le PRIMERGY TX150 S8 : le serveur tour monoprocesseur au potentiel exceptionnel !

PRIMERGY TX2540

Le PRIMERGY TX2540 de Fujitsu est le serveur tour idéal aussi bien pour les petites et moyennes entreprises (PME) que pour les filiales. Il prend en charge jusqu'à deux processeurs issus de la gamme Intel® Xeon™ E5-2400v2, alliant performances et évolutivité à un prix attractif. Sa capacité maximale de 24 disques durs et de 192 Go de RAM en fait un serveur idéal pour la virtualisation, les bases de données et la communication. De plus, la redondance proposée en option garantit un fonctionnement stable et fiable. En outre, le bruit de fonctionnement réduit au minimum convient parfaitement à un environnement de travail. Vous pouvez par exemple placer votre serveur sous votre bureau. De plus, la suite logicielle ServerView® de Fujitsu offre une assistance aux

PRIMERGY TX2560

Le PRIMERGY TX2560 de Fujitsu offre des performances optimales, une évolutivité accrue et une disponibilité élevée, sans compromis. Les filiales, les datacenters ainsi que les PME peuvent bénéficier des performances offertes avec les deux processeurs Intel® Xeon® E5 v3 associés à 1 536 Go de mémoire DDR4. Jusqu'à 10 slots d'extension et jusqu'à 32 disques durs 2,5" offrent des options d'évolution exceptionnelles. Grâce à une alimentation et des ventilateurs redondants, et à une sélection de différents contrôleurs RAID, le serveur tour garantit des niveaux de disponibilité élevés et une certaine « tranquillité d'esprit ». Le serveur est donc idéal pour les applications les plus exigeantes en ressources, les solutions de virtualisation et les applications nécessitant des capacités de stockage conséquentes.

PRIMERGY TX1320 M2

Fiches produit : http://fr.fujitsu.com/primergy

Le PRIMERGY TX1320 M1 : conçu pour les petits environnements ayant de grands besoins. Ce serveur est conçu pour les environnements où l'espace, les fonctionnalités de serveur et la réduction du coût total de possession sont déterminants. Le TX1320 M1 est idéal pour les petits bureaux, les filiales ou les domaines où des contrôles juridiques stricts sont en place, notamment dans les services médicaux, juridiques ou financiers. Outre son alimentation avec efficacité énergétique pouvant atteindre 94 %, le TX1320 M1 bat également des records en termes d'efficacité énergétique, tout en maintenant des coûts d'exploitation et un impact environnemental très bas. L'association unique des performances des processeurs Intel® Xeon® E3 dans un format compact, des fonctionnalités de haute disponibilité et du faible coût total de possession de ce serveur répond

PRIMERGY TX150 S8

Fiches produit : http://fr.fujitsu.com/primergy

Le PRIMERGY TX150 S8 : le système idéal pour les petites et moyennes entreprises, les infrastructures décentralisées et les environnements virtualisés. La nouvelle famille de processeurs Intel® Xeon® E5 offre un maximum d'évolutivité dans un serveur mono-socket. Les besoins futurs sont parfaitement couverts par les 5 slots d'extension PCIe Gen 2/3, la mémoire jusqu'à 96 Go et le stockage avec jusqu'à 16 disques durs. Des alimentations redondantes optionnelles assurent fortement la disponibilité du système. Le concept breveté Cool-safe™ de Fujitsu associé aux familles de processeurs Intel® Xeon® E5-1400 et E5-2400 garantit la meilleure efficience écoénergétique. Le PRIMERGY TX150 S8 : le serveur tour monoprocesseur au potentiel exceptionnel !

PRIMERGY TX2540 M1

Fiches produit : http://fr.fujitsu.com/primergy

Le PRIMERGY TX2540 M1 de Fujitsu est le serveur tour idéal aussi bien pour les petites et moyennes entreprises (PME) que pour les filiales. Il prend en charge jusqu'à deux processeurs issus de la gamme Intel® Xeon™ E5-2400v2, alliant performances et évolutivité à un prix attractif. Sa capacité maximale de 24 disques durs et de 192 Go de RAM en fait un serveur idéal pour la virtualisation, les bases de données et la communication. De plus, la redondance proposée en option garantit un fonctionnement stable et fiable. En outre, le bruit de fonctionnement réduit au minimum convient parfaitement à un environnement de travail. Vous pouvez par exemple placer votre serveur sous votre bureau.

De plus, la suite logicielle ServerView® de Fujitsu offre une assistance aux administrateurs lors de l'installation, du déploiement et de

PRIMERGY TX2560 M1

Fiches produit : http://fr.fujitsu.com/primergy

Le PRIMERGY TX2560 M1 de Fujitsu offre des performances optimales, une évolutivité accrue et une disponibilité élevée, sans compromis. Les filiales, les datacenters ainsi que les PME peuvent bénéficier des performances offertes avec les deux processeurs Intel® Xeon® E5 v3 associés à 1 536 Go de mémoire DDR4. Jusqu'à 10 slots d'extension et jusqu'à 32 disques durs 2,5" offrent des options d'évolution exceptionnelles. Grâce à une alimentation et des ventilateurs redondants, et à une sélection de différents contrôleurs RAID, le serveur tour garantit des niveaux de disponibilité élevés et une certaine « tranquillité d'esprit ». Le serveur est donc idéal pour les applications les plus exigeantes en ressources, les solutions de virtualisation et les applications nécessitant des capacités de stockage conséquentes.

Positionnement PRIMERGY Serveurs Rack

PRIMERGY RX1330

Le serveur PRIMERGY RX1330 de Fujitsu est un serveur rack monoprocesseur d'entrée de gamme adapté aux budgets modestes et offrant de nombreuses extensions en option, pour répondre au mieux aux exigences de chacun. Il convient parfaitement aux applications de fichiers et d'infrastructure et de communication avec un maximum de 32 Go de mémoire RAM, 3 slots PCIe et jusqu'à 10 disques durs. Ce serveur 1U offre en outre de nombreuses possibilités de configuration avec une vaste sélection d'options : alimentations hot-plug, ventilateurs redondants, contrôleur RAID.

PRIMERGY RX2530

Le serveur rack PRIMERGY RX2530 de 1U offre des performances élevées, une grande évolutivité et une excellente efficacité énergétique dans un boîtier 1U compact. Ce serveur est idéal pour la virtualisation, les scénarios d'expansion, les petites bases de données et l'informatique hautes performances grâce à la puissance des nouveaux processeurs Intel® Xeon® E5-2600 v3 comptant jusqu'à 18 coeurs et dotés de la dernière technologie de mémoire DDR4. De plus, le RX2530 est très évolutif : jusqu'à 1 536 Go de mémoire DDR4, dix disques durs et jusqu'à quatre disques SSD PCIe haut débit en option ainsi que la technologie flexible DynamicLoM, ce qui permet d'anticiper les exigences futures tout en

PRIMERGY RX2540

Le serveur PRIMERGY RX2540 de FUJITSU définit des normes supérieures en matière d'utilisation, d'évolutivité et de rentabilité. Il s'agit d'un serveur rack biprocesseur 2U idéal pour les charges de travail liées aux applications d'entreprise, à la collaboration et à la messagerie, ainsi que pour les bases de données traditionnelles. D'autre part, elle simplifie considérablement les tâches effectuées liées à l'infrastructure comme la virtualisation et la consolidation des serveurs. Une des innovations principales : les performances polyvalentes sont garanties par une nouvelle génération de processeurs. Le PRIMERGY RX2540 M1 peut être équipé de deux processeurs Intel® Xeon® E5-2600 v3 comportant jusqu'à 36 coeurs. En plus de la nouvelle technologie de mémoire DDR4, il accroît les performances d'application, pouvant ainsi s'adapter à la croissance continue des données. La conception modulaire du serveur offre une excellente évolutivité, avec un maximum de 24 disques durs, une densité de stockage élevée, la technologie DynamicLoM, jusqu'à 8 slots d'extension d'E/S PCIe Gen 3.

PRIMERGY RX2560

Le serveur rack PRIMERGY RX2560 de 4 U offre un maxium de performances, une grande évolutivité et une disponibilité élevée, sans aucun compromis. Les filiales, les datacenters ainsi que les PME peuvent bénéficier des performances offertes avec les deux processeurs Intel® Xeon® E5 v3 associés à 1 536 Go de mémoire DDR4. Les 10 slots d'extension et la capacité de stockage jusqu'à 32 disques durs 2,5" offrent des options d'évolution exceptionnelles. Grâce à une alimentation et des ventilateurs redondants, et à une sélection de différents contrôleurs RAID, le serveur tour garantit des niveaux de disponibilité élevés et une certaine « tranquillité d'esprit ». Le serveur est donc idéal pour les applications les plus exigeantes en ressources, les solutions de virtualisation et les applications nécessitant des capacités de stockage conséquentes.

PRIMERGY RX4770

Le serveur FUJITSU PRIMERGY RX4770 est un système standard x86 avec quatre sockets offrant un niveau supérieur de performance, d'évolutivité et d'efficacité. Cette association fait du serveur une plate-forme idéale pour les bases de données et les applications à haute densité de transaction, les bases de données centrales et en mémoire. D'autre part, elle simplifie considérablement les tâches effectuées liées à l'infrastructure comme la virtualisation et la consolidation des serveurs. Le processeur Intel® Xeon® de la gamme E7 v2 avec un maximum de 60 coeurs permet une incroyable amélioration des performances informatiques pour offrir des résultats plus efficaces. La mémoire d'une capacité trois fois supérieure à celle de la génération précédente permet au système de gérer facilement les charges de données intensives et complexes comme les bases de données centrales et l'analyse de données en temps réel. Grâce à une redondance intégrée et des composants hot-plug ainsi que des fonctions RAS essentielles avancées telles que les technologies Resilient System et Memory, le RX4770 offre une plus grande disponibilité.

PRIMERGY RX1330 M1

Fiches produit : http://fr.fujitsu.com/primergy

Le PRIMERGY TX120 S3p : conçu pour les petits environnements ayant de grands besoins. Ce serveur est conçu pour les environnements où l'espace, les fonctionnalités de serveur et la réduction du coût total de possession sont déterminants. Le TX120 S3p est idéal pour les petits bureaux, les filiales ou les domaines où des contrôles juridiques stricts sont en place, notamment dans les services médicaux, juridiques ou financiers. Outre son alimentation avec efficacité énergétique pouvant atteindre 94 % et sa fonction 0-Watt, le TX120 S3p bat également des records en termes d'efficacité énergétique, tout en maintenant des coûts d'exploitation et un impact environnemental très bas. L'association unique des performances des processeurs Intel® Xeon® E3 dans un format compact, des fonctionnalités de haute disponibilité et du faible coût total de

PRIMERGY RX2520 M1

Fiches produit : http://fr.fujitsu.com/primergy

Le Fujitsu PRIMERGY RX2520 M1 est une plate-forme efficace et évolutive conçue pour les applications professionnelles. Ce serveur rack biprocesseur est doté des processeurs Intel® Xeon® les plus récents de la gamme E5-2400 v2 avec une mémoire RAM allant jusqu'à 192 Go. Le PRIMERGY RX2520 vous offre un excellent rapport qualité/prix. Avec jusqu'à 12 disques de stockage de 3,5" ou 16 de 2,5" intégrés, son châssis modulaire compact PRIMERGY 2U le dote d'un environnement très performant pour les applications et les services qui requièrent du stockage. De plus, le RX2520 est prévu pour répondre aux exigences ultérieures en offrant des options modulaires supplémentaires ainsi que des kits de mise à niveau pour les LAN, RAID et stockage. Les unités d'alimentation offrant 96 % d'efficacité énergétique et le système de gestion iRMC S4 amélioré réduisent

PRIMERGY RX2530

Fiches produit : http://fr.fujitsu.com/primergy

Le serveur rack PRIMERGY RX2530 M1 de 1U offre des performances élevées, une grande évolutivité et une excellente efficacité énergétique dans un boîtier 1U compact. Ce serveur est idéal pour la virtualisation, les scénarios d'expansion, le s petites bases de données et l'informatique hautes performances grâce à la puissance des nouveaux processeurs Intel® Xeon® E5-2600 v3 comptant jusqu'à 18 coeurs et dotés de la dernière technologie de mémoire DDR4. De plus, le RX2530 M1 est très évolutif : jusqu'à 1 536 Go de mémoire DDR4, dix disques durs et jusqu'à quatre disques SSD PCIe haut débit en option ainsi que la technologie flexible DynamicLoM, ce qui permet d'anticiper les exigences futures tout en réalisant des économies.

PRIMERGY RX2540

Fiches produit : http://fr.fujitsu.com/primergy

Le serveur PRIMERGY RX2540 M1 de FUJITSU définit des normes supérieures en matière d'utilisation, d'évolutivité et de rentabilité. Il s'agit d'un serveur rack biprocesseur 2U idéal pour les charges de travail liées aux applications d'entrepris e, à la collaboration et à la messagerie, ainsi que pour les bases de données traditionnelles. D'autre part, elle simplifie considérablement les tâches effectuées liées à l'infrastructure comme la virtualisation et la consolidation des serveurs. Une des innovations principales : les performances polyvalentes sont garanties par une nouvelle génération de processeurs. Le PRIMERGY RX2540 M1 peut être équipé de deux processeurs Intel® Xeon® E5-2600 v3 comportant jusqu'à 36 coeurs. En plus de la nouvelle technologie de mémoire DDR4, il accroît les performances d'application, pouvant ainsi s'adapter à la croissance continue des données. La conception modulaire du serveur offre une excellente évolutivité, avec un maximum de 24 disques durs, une densité de stockage élevée, la technologie DynamicLoM, jusqu'à 8 slots d'extension d'E/S PCIe Gen 3.

PRIMERGY RX2560

Fiches produit : http://fr.fujitsu.com/primergy

Le serveur rack PRIMERGY RX2560 M1 de 4 U offre un maxium de performances, une grande évolutivité et une disponibilité élevée, sans aucun compromis. Les filiales, les datacenters ainsi que les PME peuvent bénéficier des performances offertes avec les deux processeurs Intel® Xeon® E5 v3 associés à 1 536 Go de mémoire DDR4. Les 10 slots d'extension et la capacité de stockage jusqu'à 32 disques durs 2,5" offrent des options d'évolution exceptionnelles. Grâce à une alimentation et des ventilateurs redondants, et à une sélection de différents contrôleurs RAID, le serveur tour garantit des niveaux de disponibilité élevés et une certaine « tranquillité d'esprit ». Le serveur est donc idéal pour les applications les plus exigeantes en ressources, les solutions de virtualisation et les applications nécessitant des capacités de stockage

Positionnement PRIMERGY Serveurs Blade

PRIMERGY BX900 S2

Le BX900 ou "Dynamic Cube" offre la performance, l'évolutivité, la disponibilité et la flexibilité que vous recherchez pour vos besoins dans le cadre de projet de consolidation et virtualisation dans votre Data Center. Le châssis BX900 S2 peut recevoir jusqu'à 18 serveurs lames biprocesseur dans un format rack de 10U. Sa densité et sa possibilité de cascading jusqu'à 4 châssis offre une évolutivité inégalée ppour une protection totale de votre investissement.

PRIMERGY BX400 S1

Le système Fujitsu PRIMERGY BX400 est une infrastructure informatique polyvalente « dans une boîte ». Ce serveur lame convient parfaitement aux entreprises de taille moyenne et filiales comme aux plus grandes structures. Le PRIMERGY BX400 est un système idéal, car il vous propose une solution plus intelligente pour configurer une infrastructure informatique qui prendra en charge vos processus d’entreprise avec moins de câbles, ainsi qu’une consommation d’énergie et un encombrement moins importants. Ce système vous apporte une combinaison idéale de lames de connexion, de stockage et serveur dans un petit boîtier.

PRIMERGY BX400 S1

Fiches produit : http://fr.fujitsu.com/primergy

Le système Fujitsu PRIMERGY BX400 est une infrastructure informatique polyvalente « dans une boîte ». Ce serveur lame convient parfaitement aux entreprises de taille moyenne et filiales comme aux plus grandes structures, en tant qu'extension du système PRIMERGY BX900, qui ne nécessite pas les performances de calcul de 18 lames serveur. Le PRIMERGY BX400 facilite les opérations informatiques tout au long de son cycle de vie. Puisqu'il s'agit d'une solution d'entreprise complète, le serveur lame permet d'économiser du temps et de l'argent dès le début et reste facile à gérer avec les ressources existantes. Le PRIMERGY BX400 est un système idéal, car il vous propose une solution plus intelligente pour configurer une infrastructure informatique qui prendra en charge vos processus d'entreprise avec moins de câbles, ainsi qu'une consommation d'énergie et un encombrement moins importants. Ce système vous apporte une combinaison idéale de lames de connexion, de stockage et serveur dans un petit boîtier. Il est caractérisé par sa conception complète et conviviale comportant une solution simple pour l'installation et l'administration.
Ce serveur lame offre une infrastructure modulaire pour un usage adapté à la fois aux environnements de bureau et aux centres de données, ainsi que
la possibilité d'utiliser une technologie de pointe avec une flexibilité et une bande passante E/S importantes. Le boîtier PRIMERGY BX400 est disponible en deux versions différentes. La version rack peut être facilement intégrée aux racks 19 pouces de Fujitsu ou

Le Dynamic Cube

Le PRIMERGY BX900 S2 de Fujitsu est une infrastructure dynamique et réactive de serveur dans une seule boîte. Ce serveur lame peut s'adapter de façon dynamique à divers besoins informatiques et fournit des avantages économiques réels pour un nombre toujours plusélevé d'applications. Le PRIMERGY BX900 peut accueillir jusqu'à 18 lames serveur et lames de stockage dans un châssis de 10U. Il est ainsi le leader de sa catégorie en termes de densité dans un format compact. Le concept de refroidissement breveté de Fujitsu, Cool-safe™, associé aux alimentations certifiées 80Plus Platinum offrant une gestion de l'alimentation globale, réduit vos coûts et garantit une utilisation plus efficace de l'énergie et de la capacité de refroidissement. La gestion centralisée des environnements physiques et virtualisés et les possibilités de virtualisation de l'ensemble des E/S, associées à un système entièrement redondant, donne une véritable souplesse aux opérations métier. De plus, le PRIMERGY BX900 S2 offre des améliorations en termes de connectivité évolutive avec la prise en charge des connexions InfiniBand haut débit (FDR InfiniBand) avec bande passante de 56 Gbit/s. Les lames serveurs, équipées des derniers processeurs Intel® Xeon® séries 5500 et 5600 et de la nouvelle génération de processeurs Intel® Xeon® E5, offrent des performances évolutives qui répondent aux exigences des scénarios de virtualisation/consolidation les plus complexes pour les applications d'entreprises critiques, et des applications hautes performances les plus gourmandes en ressources. Avec des fonctionnalités avancées comme les slots DIMM haut débit (jusqu'à 24) et le contrôleur Converged Network Adapter 10 Gbit intégré, les nouvelles lames serveurs PRIMERGY offrent la plus forte capacité mémoire dans une lame biprocesseur et placent toujours plus haut la barre des possibilités

PRIMERGY Connection Blades

Fiches produit : http://fr.fujitsu.com/primergy

Description	Détails	Référence	Prix Indicatif (€)	Remarques
Unités de Base				
PRIMERGY Connection Blades				
PY CB Eth Switch/IBP 1Gb 36/12	Connexion LAN Blade pour Fujitsu PRIMERGYBX400 et BX900 Blade Servers., Utilisation comme switch L2 LAN ou Intelligent Blade Panel (IBP) ou End Host Mode (EHM) module., Interfaces: interne 36 (downlinks), externe 8 RJ45 GbE, 4 SFP GbE	S26361-K1304-V301	3354,12	
PY CB Eth Switch/IBP 1Gb 18/6	1Gb LAN Connection Blade for Fujitsu PRIMERGY BX400 and BX900 Blade Servers., Usable as LAN switch or Intelligent Blade Panel (IBP)., , Interfaces:, intern:<Tab/>18x 1Gbit/s Eth (downlinks), extern:<Tab/> 6x RJ45 1Gbit/s Eth	S26361-K1366-V300	2292,94	
PY CB Eth Switch/IBP 1Gb 36/8+2	Connexion LAN Blade pour Fujitsu PRIMERGY BX900 Blade Servers., Utilisation comme switch LAN ou Intelligent Blade Panel (IBP)., Interfaces: interne 36 (downlinks), externe 8 RJ45 GbE, 2 SFP+ 10GbE	S26361-K1304-V302	6155,29	
PY CB Eth FEX B22F 10Gb 16/8	10Gbit/s LAN Connection Blade for Fujitsu PRIMERGY BX400 and BX900 Blade Servers., The Cisco FEX B22F is designed for attachment to switches of the Cisco Nexus 5000 and Nexus 6000 families., Switches out of the Cisco Nexus 7000 family do not support the embedded FEX modules., , Interfaces:, intern: 16x 10Gbit/s Eth (downlinks to server 1 - 16), extern: 8x SFP+ 10Gbit/s	S26361-K1440-V300	9669,41	
PY CB Eth FEX B22F with 16 FET 10Gb 16/8	10Gbit/s LAN Connection Blade for Fujitsu PRIMERGY BX400 and BX900 Blade Servers., The Cisco FEX B22F is designed for attachment to switches of the Cisco Nexus 5000 and Nexus 6000 families., Switches out of the Cisco Nexus 7000 family do not support the embedded FEX modules., The included 16 FET modules are only for Ultra Short Range connection between the FEX B22F and the parent switch., , Interfaces:, intern: 16x 10Gbit/s Eth (downlinks to server 1 - 16), extern: 8x SFP+ 10Gbit/s Eth	S26361-K1440-V310	15352,94	
PY CB FC Pass Thru 8Gb 18/18	Fibre Channel Pass Thru Connection Blade pour PRIMERGY BX900 Blade Servers, doté de 18 downlinks et 18 uplinks, tous indépendants les uns des autres supporte 4Gb/8Gb Fibre Channel avec autonegotiation	S26361-K1363-V318	4529,41	
40GBE CONNECTION BLADE 18/8+2	10/40Gbit/s LAN Connection Blade for Fujitsu PRIMERGY BX400 and BX900 Blade Servers., , Interfaces:, internal: 18x 10Gbit/s Eth (downlinks), external: 8x 10Gbit/s Eth SFP+, 2x 40Gbit/s Eth QSFP+	S26361-K1533-V300	9235,29	
PY CB FC Switch 8Gb 18/8 14 (Brocade)	Fibre Channel Switch 8Gbit/s 18/8 (Brocade 5450) Connection Blade for Fujitsu PRIMERGY Blade Servers, embedded in the basic unit are:, - License for 14 Ports with DPOD (Dynamic Ports on Demand), - Access Gateway, - License for Full Fabric, - License for Enhanced Group Management, - 4 x Brocade hot-pluggable SFP+ module, 8Gbit/s Short-Wavelength Laser (SWL), LC connector	S26361-K1305-V314	3778,82	
PY CB Eth Pass Thru 1/10G 18/18	1/10Gbit/s Ethernet Pass Thru Connection Blade for Fujitsu PRIMERGY BX900 Blade Servers, with 18 downlinks and 18 uplinks, all pathes are 100% decoupled from other each other and support 1Gb/10Gb Ethernet speed	S26361-K1365-V318	5036,47

PRIMERGY CX400 M1

Fiches produit : http://fr.fujitsu.com/primergy

Avec le serveur PRIMERGY CX400 M1 de Fujitsu, les entreprises ainsi que les institutions de développement et de recherche peuvent maintenant faire face aux défis d'envergure qui les attendent. Le système rack de 2U contient jusqu'à quatre noeuds serveur, 8 processeurs Intel® Xeon® et 64 modules de mémoire DIMM DDR4, offrant ainsi des niveaux de performance et d'efficacité énergétique inégalés. Le système évolutif s'adapte parfaitement à une variété d'applications grâc e à sa grande modularité. Lorsque de nouveaux besoins apparaissent, des noeuds serveur, des cartes de co -processeur ou des disques durs supplémentaires peuvent être ajoutés. Le PRIMERGY CX400 M1 l'emporte sur les serveurs rack traditionnels grâce à sa double densité de serveur ainsi que ses coûts matériels et d'exploitation peu élevés. Le système est ainsi un composant réplicable idéal pour la mise en oeuvre de solutions scale -out à grande échelle.

PRIMERGY CX2550 M1

Fiches produit : http://fr.fujitsu.com/primergy

Le PRIMERGY CX2550 M1 est un noeud serveur compact offrant une densité de calcul très élevée avec quatre serveurs indépendants dans un châssis 2U. Il est idéal pour le Cloud, les clusters et les besoins en informatique hautes performances (HPC), mais également pour les environnements dédiés aux grosses données.
Associés dans un système à noeuds multiples PRIMERGY CX400 M1, les serveurs offrent une performance évolutive totale exceptionnelle grâce aux 8 processeurs de la dernière gamme Intel® Xeon® E5-2600 v3, aux 64 modules de mémoire DIMM DDR4 et aux 24 emplacements pour disques de stockage dans un boîtier rack 2U. Grâce à un potentiel de performance exceptionnel, une efficacité énergétique élevée et un coût d'investissement attractif, le PRIMERGY CX2550 M1 offre une grande polyvalence et permet d'envisager des charges de travail ambitieuses.

PRIMERGY CX2570 M1

Fiches produit : http://fr.fujitsu.com/primergy

Le PRIMERGY CX2570 M1 est un noeud serveur compact offrant une densité de calcul très élevée avec deux serveurs indépendants dans un châssis 2U. Il est idéal pour les solutions HPC, d'analyse et de virtualisation particulièrement exigeantes. Deux noeuds serveur peuvent être intégrés dans le boîtier PRIMERGY CX400 M1 qui occupe seulement l'espace équivalent à 2U d'un rack de Datacenter standard traditionnel. Le PRIMERGY CX2570 M1 associe des performances de calcul et graphiques très élevées à une grande efficacité énergétique. Chaque noeud serveur demi-largeur équipé d'un processeur de la gamme Intel® Xeon® E5-2600 v3 et de 16 modules de mémoire DIMM DDR4, comprend jusqu' à deux cartes graphiques NVIDIA® GPGPU ou de co-processeur Intel® Xeon Phi™ pour des performances

Systèmes de stockage disque

Fiches produit : http://fr.fujitsu.com/stockage

Evolutifs et unifiés, les systèmes de stockage Fujitsu ETERNUS DX60, DX100 et DX200 S3 offrent des fonctionnalités de classe entreprise pour les petites et moyennes entreprises et les filiales, avec un excellent rapport prix/performances. L'architecture de la gamme ETERNUS DX permet aux clients de bénéficier des options logicielles, telles que le Thin Provisioning, la gestion automatique des classes de stockage (Tiering) et la gestion de la qualité de service (QoS).

ETERNUS DX60 - DX100 - DX200 S3

Evolutifs et unifiés, les systèmes de stockage Fujitsu ETERNUS DX500 et DX600 S3 offrent une haute performance de stockage de pointe et une gestion automatique de qualité de service (QoS), ce qui permet une utilisation des systèmes optimale et contribue à un rapide retour sur investissement. C'est la solution idéale pour consolider dans une seule baie les grandes applications d'entreprise, leurs bases de données de production et les volumineux entrepôts de données nécessaires à l'analyse et la prise de décision par les directions métiers.

ETERNUS DX500 S3 - DX600 S3

Les ETERNUS JX40 (disques 2.5") et JX60 (disques 3.5") sont des systèmes de stockage à attachement direct (JBOD) qui permettent d'étendre la capacité de stockage des serveurs PRIMERGY

ETERNUS JX40 - JX60

L'ETERNUS CS200c est une appliance de protection unifiée des données powered by CommVault Simpana qui est une solution complète de sauvegarde et d'archivage en intègrant matériel optimisé, logiciels et licences . Elle a un modèle Entry de 2 à 24 To de capacité nette et un modèle Scale qui dispose d'une évolutivité de stockage de 6 à 96 To.

ETERNUS CS200c

L'ETERNUS CS800 S5 est une solution clé en main pour la protection et la sauvegarde des données avec la fonction de déduplication intégrée. Elle offre une capacité nette de stockage de 4 To à 320 To en connexion NAS, VTL ou OST.

ETERNUS CS800 S5

ETERNUS DX60 S3 & ETERNUS DX60 / DX80 / DX90 S2 Fiches produit : http://fr.fujitsu.com/stockage

ETERNUS DX60 S3 - La baie de stockage disque idéale pour la PME

Grâce à sa robustesse de fonctionnement et à son prix abordable, l'ETERNUS DX60 S3 est une baie de stockage sur disque idéale pour l'environnement informatique de la PME. Le logiciel d'administration, livré gratuitement, réduit la charge de gestion opérationnelle et fournit des outils pour protéger les données. La capacité de mixer tout type de connexion réseau et de disques dans la même baie apporte une grande liberté de choix pour optimiser une configuration en termes de coût et de performances. Conçue pour être simple à installer dans les environnements informatiques les plus petits, elle offre cependant une capacité d'évolution exceptionnelle en terme de volume de données à stocker. La solution de stockage idéale pour

ETERNUS DX8700 S3 — Fiches produit : http://fr.fujitsu.com/stockage

ETERNUS DX8700 S3 - La plus évolutive au monde des baies de stockage haut de gamme

Les nouvelles baies de stockage high-end ETERNUS DX8700 et DX8900 S3 permettent de faire face à la croissance exponentielle des données. Leur architecture « pay-as-you-grow » en fait les plus flexibles et les plus évolutives du marché. Une automatisation intelligente permet aux entreprises de gérer de plus larges volumes de données tout en bénéficiant d'excellents niveaux de service
La continuité de production requise pour les données critiques de l'entreprise est assurée grâce à une redondance de bout en bout et au basculement transparent au sein d'un cluster de baies. Délivrant jusqu'à 4 millions d'opérations d'entrée/sortie par seconde (IOPS) et une capacité de stockage massive pouvant atteindre 14 pétaoctets, cette solution propose une

ETERNUS JX40

Fiches produit : http://fr.fujitsu.com/stockage

ETERNUS JX40 - Systèmes de stockage disque à attachement direct (JBOD)
Le stockage SAS ETERNUS JX40 est un système de stockage passif connectable directement sur le serveur via une connexion SAS 6 Gb/s. Il permet d'étendre les capacités de stockage disque des serveurs PRIMERGY. Avec son format rack 2U, ETERNUS JX40 permet de répondre à des besoins de capacité de stockage complémentaires dans un boîtier compact intégrable dans une armoire rack 19" standard. Il peut recevoir jusqu'à 24 disques 2.5" pour une capacité totale de 12 To. Il est possible de configurer jusqu'à 3 ETERNUS JX40 en cascade pour atteindre une capacité disque de 36 To.
Au sein de ETERNUS JX40, les composants actifs - disques durs hot-plug et module d'alimentation hot-plug - peuvent être remplacés en cours d'exploitation. Les alimentations hot-plug et redondantes peuvent êre connectées sur des phases redondantes via des lignes d'alimentation séparées. L'optimisation du refroidissement des disques durs pour sécuriser les

ETERNUS JX60

Fiches produit : http://fr.fujitsu.com/stockage

ETERNUS JX60 - Systèmes de stockage disque à attachement direct (JBOD)
La baie de stockage passif de type JBOD est une solution économique pour étendre les capacités de stockage interne d'un serveur. Comme le volume des données à stocker augmente plus rapidement que la capacité des disques, le nombre de disques à installer s'accroît encore plus vite, ce qui entraîne une consommation plus forte d'espace dans les racks. C'est pour résoudre ce dilemme que la baie de stockage JBOD ETERNUS JX60 de Fujitsu offre une très haute densité de stockage dans un minimum d'espace. Elle peut contenir jusqu'à 60 disques Nearline SAS de 3,5" dans un boîtier de seulement 4U (quatre unités de hauteur de rack). En connectant directement sur le serveur jusqu'à quatre boîtiers, il est ainsi possible d'atteindre une capacité totale de

ETERNUS CS200 - Appliance de protection unifiée des données powered by CommVault Simpana

L'ETERNUS CS200c intègre matériel optimisé, logiciels et licences dans une solution complète de protection de données unifiée (sauvegarde et archivage). L'appliance permet d'installer rapidement et facilement un environnement de sauvegarde et d'archivage riche en fonctionnalités. Le logiciel Simpana de CommVault, leader technologique, exploite toute la puissance des systèmes Fujitsu pour délivrer la performance attendue par l'entreprise selon le modèle choisi dans la gamme. L'ETERNUS CS200c a un modèle Entry de 2 à 24 To de capacité nette et un modèle Scale qui dispose d'une évolutivité de stockage de 6 à 96 To.

ETERNUS CS800

Fiches produit : http://fr.fujitsu.com/stockage

ETERNUS CS800 - Une solution clé en main pour la protection des données avec déduplication pour les petites et moyennes entreprises

L'ETERNUS CS800 est la solution idéale pour les entreprises qui recherchent la performance des sauvegardes sur disques, une capacité à répliquer les données sur un site distant tout en réduisant les coûts et la surface de stockage. L'appliance offre les performances de sauvegarde très rapides jusqu'à 11,5 To par heure en mode cible en ligne conventionnel, sans restriction sur les logiciels de sauvegarde ni pré-requis de logiciels . L'ETERNUS CS800 S5 a un modèle Entry de 4 à 24 To de capacité et un modèle Scale qui dispose d'une évolutivité de stockage de 16 à 320 To.

LTO Desktop

Lecteur au format Desktop disponible avec un lecteur LTO-4, LTO-5 ou LTO-6 pour un débit rapide des sauvegardes

SCALAR i500

Librairie moyenne gamme modulaire offrant évolutivité, performance et fiabilité parmi les meilleures du marché.

ETERNUS LT20 S2

ETERNUS LT20 S2 est un auto-chargeur économique ultracompact et extrêmement fiable pour les petites et moyennes entreprises. Il peut recevoir jusqu'à 8 cartouches et 1 lecteur LTO-4, LTO-5 ou LTO-6

ETERNUS LT40 S2

ETERNUS LT40 S2 est un auto-chargeur compacte pouvant recevoir jusqu'à 24 cartouches et deux lecteurs LTO-4, LTO-5 ou

ETERNUS LT60 S2

ETERNUS LT60 S2 est une librairie compacte avec une capacité jusqu'à 48 cartouches et pouvant disposer 4 lecteurs LTO-4, LTO-5 ou LTO-6 dans un format rack (4U).

ETERNUS LT260

ETERNUS LT260 est une librairie automatisée et évolutive jusqu'à 1 Po de données compressées. Elle dispose d'une capacité de 80 à 160 cartouches et jusqu'à 12 lecteurs LTO-5 ou LTO-6 dans un format rack (6U ou 12U avec son extension).

LTO Desktop

Fiches produit : http://fr.fujitsu.com/stockage

Ce lecteur LTO au format desktop est une solution de sauvegarde performante pour les petits serveurs. La technologie LTO Ultr ium est particulièrement bien adaptée pour la sauvegarde de données critiques nécessitant un débit important.

Librairie LTO de 24 à 48 slots

L'ETERNUS LT60 est équipé de la technologie LTO qui est synonyme de haute capacité, de rapidité et de média à faible coût. Il propose une capacité de stockage jusqu'à 300 To (LTO-6 en mode compressé) en format rack de 2U avec de 24 à 48 emplacements pour les cartouches. Il peut recevoir de 2 à 4 lecteurs LTO-4, LTO-5 ou LTO-6. Il accepte des connexions SAS ou Fibre Channel.

Comme toute la gamme de stockage de Fujitsu dédiée aux petites et moyennes entreprises, l'ETERNUS LT60 est très facile à

Librairie de bandes automatisée et évolutive jusqu'à 1 Po de données

La librairie de bandes ETERNUS LT260 LTO associe une flexibilité d'évolution, une densité de stockage exceptionnelle et une automatisation des fonctions de gestion en local ou à distance pour faire face à la rapidité de croissance des volumes de données à protéger avec une très grande efficience. Elle peut accueillir 500 To de données compressées dans l'unité de base de 6U de hauteur. Cette capacité peut être doublée simplement en ajoutant une unité d'extension. Chaque unité contient 80 slots et de 1 à 6 lecteurs de bande pour la connectivité, la performance ou la redondance. L'ETERNUS LT260 est divisible en 6 partitions maximum par unité pour desservir différents environnements applicatifs en parallèle. Une

ETERNUS LT260 (Suite)					
	ET LT260 Extension Unit 80LTO Cart.Slots	ETERNUS LT260 extension unit with 80 cartridge slots, , The ETERNUS LT260 extension unit is an expansion module for the ETERNUS LT260 base unit only. The tape drive slots can be used for LTO-5, LTO-6 and / or LTO 7 half height tape drives with SAS and / or FC interfaces. Max. of 6 LTO tape drives are possible, for every 3 LTO drives a drive power module (max. 2) is needed; you need also an additional power supply (max 1), if more than 3 tape drives need to be installed. Two cartridge magazines with each 40 slots (left & right) are always installed. The storage capacity is dependent of the LTO technology and number of LTO cartridges used. Possible tape drive interface are SAS 6Gb/s (SFF8088) or FC 8Gb/s. The parallel processing of LTO 5, LTO 6 and LTO 7 cartridges are generally possible. Each offered LTO tape drive can read three LTO generations and write two LTO generations (example: LTO-5 tape drive can read LTO-3, LTO-4 and LTO-5 cartridges and read & write LTO-4 and LTO-5 cartridges). The ETERNUS LT260 base and extension units must be installed into a 19" rack and consume 6U of rack space each. The extensionmodule has always to be assembled below the base unit! The ETERNUS LT260 extension unit shipments include:, , -1x Rack Kit, -1x Power Supply Unit (max. 2 PSU possible)., -1x Power Cord 2,5m (Rack connecting: IEC-60320 C13 / C14, max 10 Ampere), - 0x drive power module mounted (max 2 possible), , ,	FTS:LT26FZ80	9451,76

SCALAR i500

Fiches produit : http://fr.fujitsu.com/stockage

Scalar i500 est une librairie moyenne gamme intelligente avec une grande évolutivité, performance et fiabilité.
L'évolutivité de la capacité de stockage à la demande du Scalar i500 permet une croissance ininterrompue de 41 à 409 slots de cartouches. Le mécanisme unique et continu de la robotique garantit un transfert rapide et fiable des cartouches. L'architecture iPlatform et le logiciel d'administration rendent la sauvegarde plus aisée et permettent de conserver un total contrôle des processus grâce à une surveillance proactive et des diagnostics à distance.
