Highlights

4.6cm (1.8") TFT color display
High contrast, 4.6cm (1.8"), TFT color display

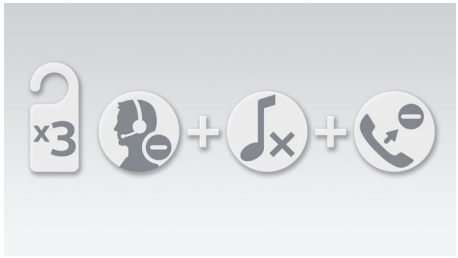

Baby monitor function
Receive an alert when your baby needs you. Just place the DECT handset in the baby room and receive an alert on your base or on another DECT phone (i.e.. another landline number) or mobile phone (when you're out) when the baby starts to cry.

Caller ID*

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

Eco-conscious model with ECO+

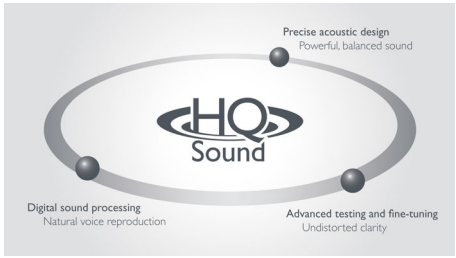

Philips phones are energy efficient and designed to be respectful to the environment. When ECO mode is activated the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. Whith ECO+ mode activation the radiation drops to zero.

Extended privacy settings

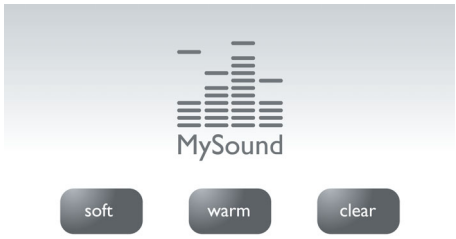

Black list restricts receiving calls from specific numbers or starting with certain digits, keeping you away from unwanted calls. You can block 4 sets of numbers. Anonymous call restricts incoming calls with hidden numbers, sometimes used by the telemarketers. The phone will also not ring such that you are not disturbed. With silence mode you can disable the ringtones for specific times to enjoy peace and silence. Thanks to Call barring you can avoid expensive phone bill surprises by blocking calls to specific numbers starting with certain digits (for example pay per call numbers).

Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

HQ-Sound

Philips cordless phones with HQ-Sound: build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything – high quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

MySound profiles

Sound perception is subjective, and everyone has their own listening preference. MySound brings personality back to every conversation by allowing you to choose the audio profile that best matches your sound preferences: Clear – to make voices sound crisper and clearer; Soft – for friendly, softer tones; Warm – to make voices sound welcoming and warm.
