SuperColor™: Best in Class Color Accuracy

ViewSonic’s proprietary SuperColor™ Technology offers a wider color range than conventional DLP projectors for true-to-life color performance in any light. SuperColor™ 6-Segment Color Wheel

maximizes brightness Increased by 15% or more with the highest color saturation over others in the same class.

Smart Restart Instant reactivation during presentation

With Smart Restart, the projector automatically enters a 3-minute standby mode when it is idle and turns down the projection to a power-saving 30% brightness. During standby mode, you can quickly and conveniently reactivate the projector for continued use without waiting for a complete power cycle.

Auto Power On Instant activation upon signal connection

With Auto Power On enabled, once a VGA or HDMI cable is connected and signal detected, LightStream™ projectors will power on automatically with effortless start-up.

Auto Power Off

Power Saving: Every Time When no signal is detected, the projector will automatically power off after a user-defined amount of time – another feature to save electricity cost, reduce energy consumption and extend the life of the projector.

Sleep Timer: Every Day Forgetting to shut off projectors is a common occurrence, particularly in public classrooms or meeting rooms. The sleep timer allows administrators to set up a timer to shut down the projector after a period of inactivity.

Quick Power Off Leave without the wait

Quick shut down in seconds because of smart electric and lamp designs are time-saving improvements that lead towards efficiency and energy savings.

Mouse-Like Control Handy operation

Mouse left and right-click buttons are provided on the remote control so users can use a single remote control to navigate through presentation slides or control the connected PC.

“My Button” Setup your favorite hotkey

Finding a function on a remote control or through the on-screen menu can be time-consuming. The “My Button” button on the remote control is a programmable shortcut button that can be user-programmed to launch a commonly used or desired function.

Keystone Distorted image correction

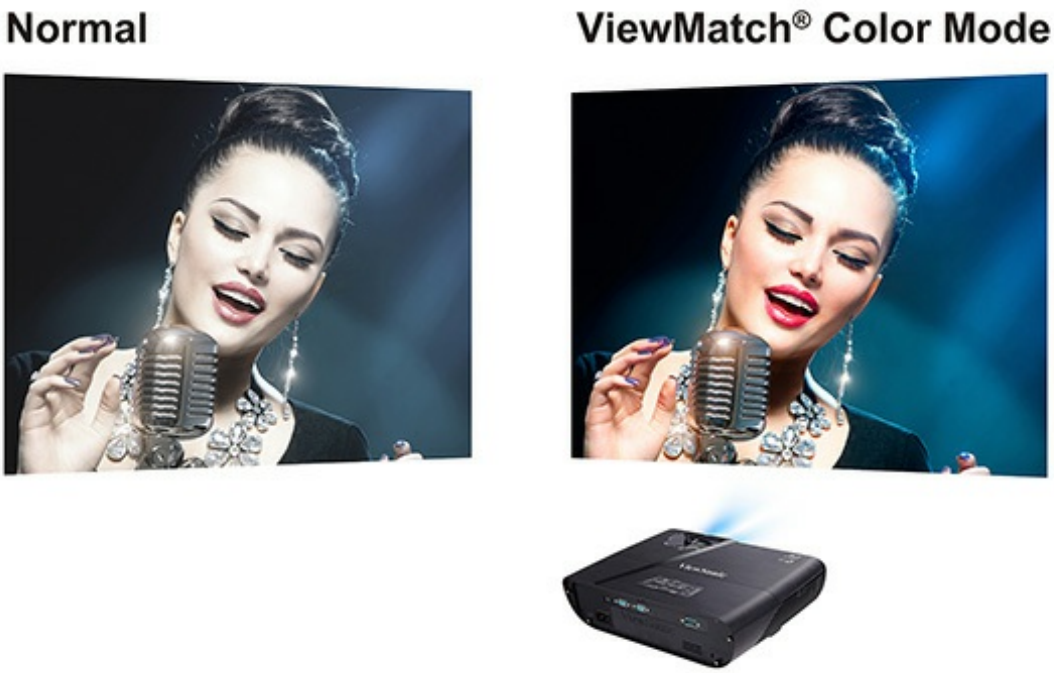

The PJD5151 can correct and adjust vertical distorted images into a more symmetric shape.

Color Mode Best view modes

Providing 5 view modes for different scenarios, users can choose one fit mode at once for best view according to the projection environment. These 5 modes are:

- Brightest Mode for environments where extra-high brightness is required
- Dynamic Mode for presentations under daylight environment and text content
- Standard Mode for matching PC or NB color
- ViewMatch Mode for general viewing
- Movie Mode for watching movies with better saturation in a dark environment

Top Lamp Door

The thoughtfully designed lamp door makes lamp maintenance and replacement easy. Located at the top of the projector, there’s no need to dismantle the projector, even if it’s hanging from the ceiling, to access the lamp. This user-friendly design saves time and effort for maintenance personnel in businesses and schools, and is easy enough that just about anyone can do it.

Presenter Timer Reminder for time management

An embedded on-screen timer assists presenters to manage their times to avoid presentation over-runs that cause potential delays during scheduled sessions.

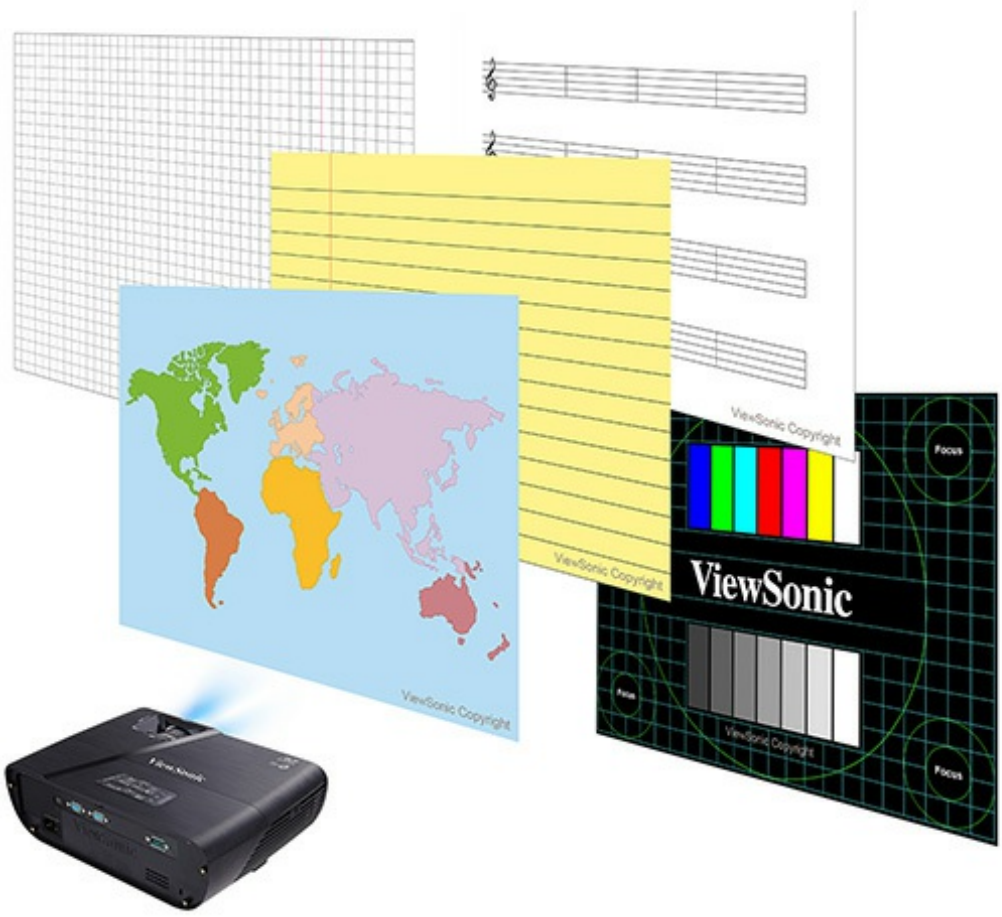

Tactile Keypads

Tactile Keypads reflect LightStream™ Projectors' detailed design to the most LightStream™ Projectors' tactile keypad is raised with concave buttons that assist in making projector set up easier in dark environments without illumination. Also, Touching and feeling the non-flat keypads can be also interesting.

Patterns and Templates World’s first projector-embedded teaching tools

Patterns are built-in templates such as tables, grids, worksheets, and charts on which teachers and students can draw when using an interactive projection. The results are fast illustrations with straight lines every time.
