Highlights

ECO+ mode

Philips phones are energy efficient and designed to be respectful to the environment. When ECO mode is activated the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. With ECO+ mode activation the radiation drops to zero.

50-name phone book

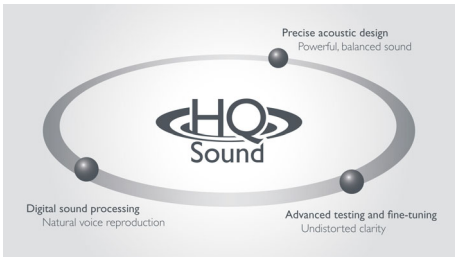

Save up to 50 favorite contacts in your phonebook

Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Superb sound quality

HQ-Sound refers to high quality acoustic engineering that results in voice quality so crisp and natural it is almost like being there in person. High quality components, precise acoustic design, advanced testing and fine tuning reflect decades of experience in high end audio systems and headphones.

Up to 16 hours talk time

Enjoy 16 hours of talk time on a single charge

Up to 25 min. message

With up to 25 minutes recording time on your answering machine, you'll never miss an important message.

Weighted base for stability

Extra weight integrated in the base for greater stability

Light ring

The smart light ring elegantly integrated at the base enhances both the Linea's design and functionality. Different colors glow to alert you to incoming and missed calls, voice messages and alarm. It also provides soft ambient light in standby mode with a choice of 3 colors – making it an ideal nightlight. You can also easily turn the light off via the fast access key on the handset keypad.

Calibrated keypad

The calibrated and carefully designed keypad ensures precise dialing where you clearly feel every keystroke whether you are dialing a number or entering a phonebook contact.

Compact footprint

Slender design and compact footprint for space efficiency

Perfect look from every angle

The smart cable management system cleverly hides the wires from sight. Intelligently designed concealed sockets and an internal cable guide ensure everything is clutter free and neatly tucked away.

Secure docking

Precisely adjusted magnets – with optimized force – are placed on the top of the handset and the base to ensure secure docking of the phone in a stable, upright position. A cleverly designed recess on the base not only serves as an attractive design highlight but also helps guide the user's hand for easy pick-up of the handset.
