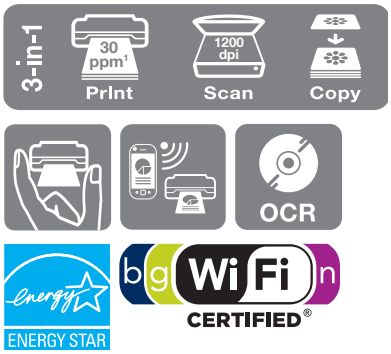
Epson **Stylus SX235W**

DATASHEET



Designed specifically for users who will be purchasing a Wi-Fi printer for the first time, the Epson Stylus SX235W is an ultra-compact package that combines value for money with great flexibility. The Epson Stylus SX235W is part of the Small-in-One range - Epson's smallest all-in-ones which are 39 percent smaller than previous models[2].

The new design coupled with an ultra-compact footprint means this Small-in-One effortlessly complements any modern home environment without taking up too much space.

Individual DURABrite Ultra Ink cartridges save users money as they only replace the colours used. DURABrite Ultra Ink is so versatile it is able to print lab-quality photos while at the same time produce crisp, clean text documents.

The automatic Wi-Fi set-up[3] makes configuring laptops and computers to print wirelessly extremely easy. Users don't need to know their network settings or connect with a USB cable, the SX235W automatically finds the relevant connection settings in order to configure itself. Multiple users then have the freedom to print, copy and scan quickly and efficiently from anywhere in the home.

The SX235W comes with Epson Connect which offers even more flexibility and freedom, allowing users to quickly and easily print photos and documents wirelessly from smartphones and tablet PCs[4].

Thanks to its ultra-compact size, this Small-in-One boasts a 25 percent reduction in packaging which means home users throw away less, helping lower their impact on the environment[5].
