The manufacturer works constantly on the further development of all the types and models. Therefore please understand that we have to reserve the right to make design, equipment and technical modifications.

To get to know all the benefits of your new appliance, please read the information contained in these instructions carefully.

The instructions apply to several models. Differences may occur. Text relating only to specific appliances is marked with an asterisk (*).

Instructions for action are marked with a ▶, the results of action are marked with a ▷.

1 Appliance at a glance

1.1 Description of appliance and equipment

Note

▶ Place food inside the appliance as shown in the diagram. This allows the appliance to save energy during operation.

▶ Shelves, drawers and baskets are arranged for optimum energy efficiency on delivery.

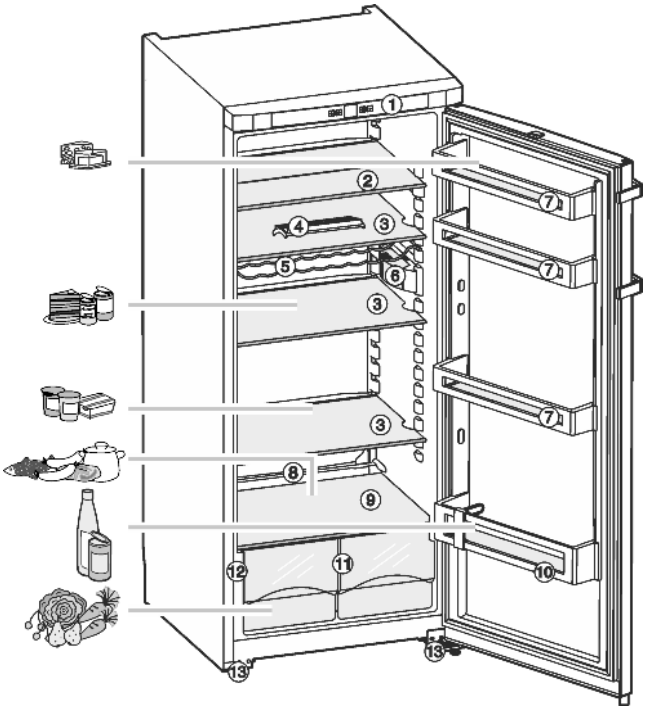

Fig. 1

(1) Operating controls
(2) Shelf, separable
(3) Shelf*, adjustable
(4) Egg tray
(5) Bottle rack
(6) Interior light
(7) Door rack, adjustable
(8) Defrost water drain
(9) Coldest area
(10) Bottle shelf*
(11) Vegetable bins
(12) Type plate
(13) Adjustable feet at the front, castors for transport at the rear

1.2 Appliance range of use

Intended use

The appliance is only suitable for refrigerating food in a domestic or domestic-like environment. This includes, for example, using

- in staff kitchens, bed and breakfast establishments,
- by guests in country houses, hotels, motels and other accommodation,
- for catering and similar services in the wholesale trade.

All other types of use are not permitted.

Foreseeable misuse

The following applications are expressly forbidden:

- Storing and refrigerating medicines, blood plasma, laboratory preparations or similar substances and products based on the Medical Device Directive 2007/47/EC
- Use in areas at risk of explosions

Misusing the appliance may lead to damage to the goods stored or they may spoil.

Climate classifications

Depending on the climate classification the appliance is designed to operate in restricted

*** Depending on model and options**

ambient temperatures. The climate classification applying to your appliance is printed on the rating plate.

Note

▶ Keep to the specified ambient temperatures in order to guarantee that the appliance works properly.

Climate classification	for ambient temperatures of
SN	10 °C to 32 °C
N	16 °C to 32 °C
ST	16 °C to 38 °C
T	16 °C to 43 °C

1.3 Conformity

The refrigerant circuit is tested for leakage. The appliance complies with the relevant safety regulations and EC Directives 2006/95/EC, 2004/108/EC, 2009/125/EC and 2010/30/EU.

1.4 External dimensions of the appliance

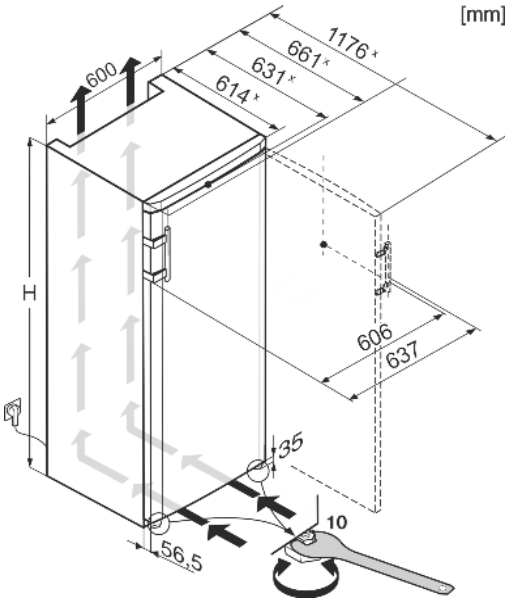

Fig. 2

	H
K(sl) 2630	1250
K(sl) 3130	1447

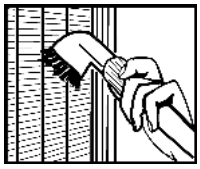

x For appliances supplied with wall spacers, the measurement increases by 35 mm (see 4.4) .

1.5 Saving energy

- Pay attention to good ventilation. Do not cover ventilation holes or grids.
- Always keep the fan air slits clear.
- Do not install the appliance in direct sunlight, next to an oven, radiator or similar.
- Energy consumption is dependent on the installation conditions, e.g. ambient temperature (see 1.2) . If the ambient temperature deviates from the standard temperature of 25°C, the energy consumption may differ.
- Open the appliance for as short a time as possible.
- The lower the temperature is set the higher the energy consumption.
- Sort food before arranging (see Appliance at a glance).
- Store all food well packaged and covered. A build up of frost is avoided.
- Only take food out for as long as necessary so that it doesn't warm up too much.
- Inserting hot food: let it cool to room temperature first.

Dust deposits increase energy consumption:

- For refrigerators with heat exchangers dust the metal grid on the back of the appliance once a year.

2 General safety information

Danger for the user:

- This appliance can be used by children of 8 years old and over, and also by persons with restricted physical, sensory or mental capacity or lack of experience and knowledge, if they are supervised or have been instructed on safe use of the appliance and understand the resulting risks. Children must not be allowed to play with the appliance. Cleaning and user maintenance must not be carried out by children without supervision.
- When disconnecting the appliance from the supply, always take hold of the plug. Do not pull the cable.
- In the event of a fault pull out the mains plug or deactivate the fuse.
- Do not damage the mains power cable. Do not operate the appliance with a defective mains power cable.
- Have any repairs to or intervention in the appliance, and any change of the mains power cable, carried out by the customer service only or by other specialised personnel trained for the purpose.
- Only assemble, connect and dispose of the appliance according to the instructions.
- Please keep these instructions in a safe place and pass them on to any subsequent owners.
- Special-purpose lamps (incandescent lamps, LEDs, fluorescent tubes) in the appliance serve to illuminate the appliance interior and are not suited for room illumination.

Fire hazard:

- The refrigerant R 600a is environmentally friendly but flammable. Escaping refrigerant may ignite.
  - Do not damage the refrigerant circuit pipes.
  - Do not allow naked flames or ignition sources to enter the appliance.

- Do not use any electrical appliances in the interior (e.g. steam cleaners, heaters, ice cream maker etc.).
- If refrigerant escapes: remove any naked flames or sources of ignition from the leakage area. Ventilate the room well. Notify the after-sales service.

- Do not store explosives or sprays using combustible propellants such as butane, propane, pentane, etc. in the appliance. To identify these spray cans, look for the list of contents printed on the can, or a flame symbol. Gases possibly escaping may ignite due to electrical components.
- Keep burning candles, lamps and other items with naked flames away from the appliance so that they do not set the appliance on fire.
- Please be sure to store alcoholic drinks or other packaging containing alcohol in tightly closed containers. Any alcohol that leaks out may be ignited by electrical components.

Danger of tipping and falling:

- Do not misuse the plinth, drawers, doors etc. as a step or for support. This applies particularly to children.

Danger of food poisoning:

- Do not consume food which has been stored too long.

Danger of frostbite, numbness and pain:

- Avoid lasting skin contact with cold surfaces or refrigerated/frozen food or take protective steps, e.g. wear gloves. Do not consume ice cream, water ice or ice cubes immediately and do not consume them too cold.

Danger of injury and damage:

- Hot steam can lead to injury. Do not use electrical heating or steam cleaning equipment, open flames or defrosting sprays to defrost.
- Do not use sharp implements to remove the ice.

Danger of crushing:

- Do not hold the hinge when opening and closing the door. Fingers may get caught.

Symbols on the appliance:

	The symbol can be located on the compressor. It refers to the oil in the compressor and indicates the following danger: Swallowing or inhaling can be fatal. This is only relevant for recycling. There is no danger in normal operation.

Please observe the specific information in the other sections:

	DANGER	identifies a situation involving direct danger which, if not obviated, may result in death or severe bodily injury.
	WARNING	identifies a dangerous situation which, if not obviated, may result in death or severe bodily injury.
	CAUTION	identifies a dangerous situation which, if not obviated, may result in minor or medium bodily injury.
	NOTICE	identifies a dangerous situation which, if not obviated, may result in damage to property.

	Note	identifies useful information and tips.

3 Controls and displays

3.1 Operating controls

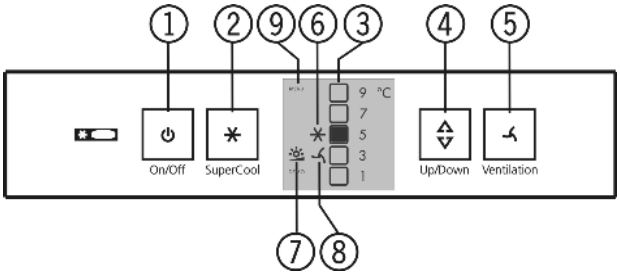

Fig. 3

(1) On/Off button
(2) SuperCool button
(3) Temperature indicator
(4) Adjustment button
(5) Ventilation button
(6) SuperCool symbol
(7) Brightness symbol
(8) Ventilation symbol
(9) Menu symbol

3.2 Temperature display

The following are displayed in normal operation:

- the set cooling temperature

4 Putting into operation

4.1 Changing over the door hinges

You can change over the door hinges if necessary.

Ensure that the following tools are to hand:

- ❑ Torx 25
- ❑ Torx 15
- ❑ Open-ended spanner size 6
- ❑ Screwdriver
- ❑ Open-ended spanner included in supply package
- ❑ Second person for fitting work, if needed

CAUTION
Risk of injury if the door tips!
▶ Take good hold of the door.
▶ Set down the door carefully.

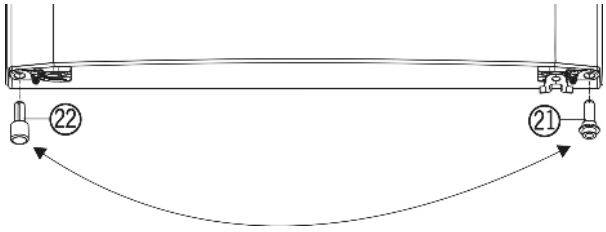

Fig. 4

- ▶ Remove the spacer *Fig. 4 (22)* from the bottom left of the door.
- ▶ Unscrew the securing screw on the bottom right turn hinge.
- ▶ Open the door.
- ▶ Hold the door on the handle side and at the bottom and lift it.
- ▷ The bearing pin *Fig. 5 (21)* should come out of the turn hinge *Fig. 6 (2)*.
- ▶ If the bearing bolt *Fig. 5 (21)* doesn't undo press it out from underneath.

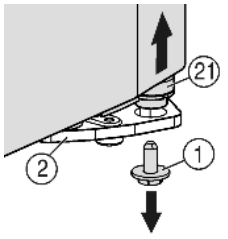

Fig. 5

- ▶ Swing door out at the bottom and remove it.

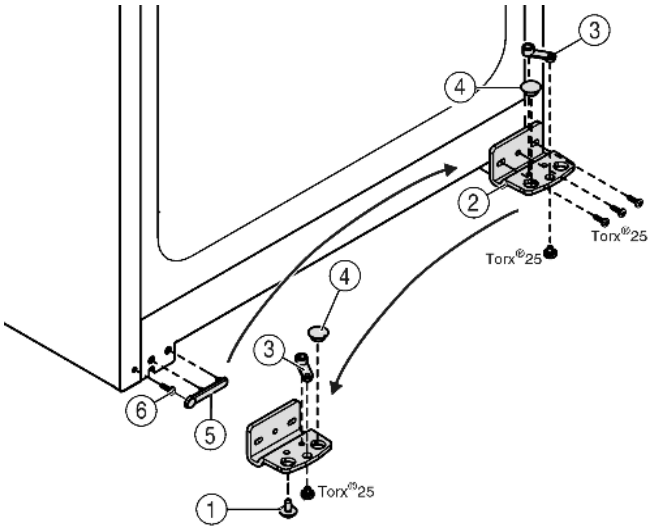

Fig. 6

- ▶ Unscrew the turn hinge *Fig. 6 (2)*.
- ▶ Unscrew the bearing element, *Fig. 6 (3)* transfer it to the opposite location hole of the turn hinge and screw it firmly into place.
- ▶ Take the stopper *Fig. 6 (4)* out of the turn hinge and transfer it to the receiving hole on the opposite side of the turn hinge.
- ▶ Carefully lift off the cover *Fig. 6 (5)* on the handle side.
- ▶ Undo the screw *Fig. 6 (6)* and transfer it to the opposite side.
- ▶ Put the cover *Fig. 6 (5)* back on.
- ▶ Screw the turn hinge *Fig. 6 (2)* firmly into place on the new hinge side **(with 4 Nm)**, possibly using a power screwdriver.

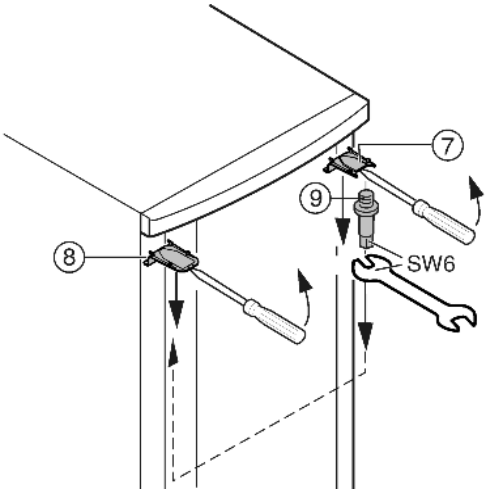

Fig. 7

- ▶ At the top, use a screwdriver to unclip cover *Fig. 7 (7)* and cover *Fig. 7 (8)* at the front, and remove by pulling out and down.
- ▶ Unscrew the bearing pin *Fig. 7 (9)* and screw it firmly into place on the opposite side **(with 4 Nm)**.
- ▶ Refit the cover *Fig. 7 (7)* on the side of the bearing pin: insert at the back, snap in at the front.
- ▶ Fit the cover *Fig. 7 (8)* on the opposite side: insert at the back, snap in at the front.

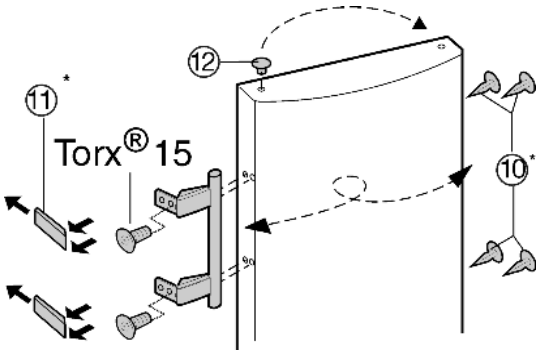

Fig. 8

- ▶ Lift the stopper *Fig. 8 (12)* out of the door bearing bush and transfer it.
- ▶ Detach door handle, stoppers *Fig. 8 (10)* and pressure plates *Fig. 8 (11)* and transfer to the opposite side.
- ▶ When mounting the pressure plates, make sure they snap into place properly.
- ▶ Transfer the spring clamp *Fig. 9 (20)*: Depress the latch nose and pull the spring clamp off over it.
- ▶ Slide the spring clamp into place on the new hinge side until it clicks into place.
- ▶ Pull the bearing pin *Fig. 9 (21)* out of the door bush and transfer it to the opposite side together with the washer. The latch nose must point to the inner side of the door, the notch to the outer side.

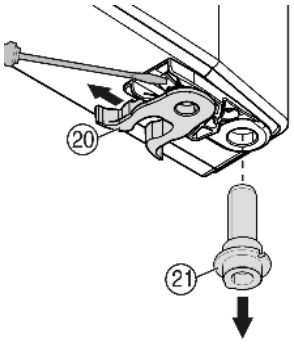

Fig. 9

- ▶ Hang the door on the bearing pin *Fig. 7 (9)* at the top.
- ▶ Swing the door in at the bottom and insert the bearing pin *Fig. 9 (21)* into the turn hinge. If necessary, turn the bearing pin until it snaps into place.
- ▶ Insert the securing screw *Fig. 5 (1)* at the bottom into the bearing pin and tighten it **(with 4 Nm)**.
- ▶ If necessary, align the door flush with the appliance housing using the two slots in the turn hinge. To do so, unscrew the middle screw.
- ▶ Push the spacer *Fig. 4 (22)* into the bottom right of the door.

WARNING
Risk of injury due to the door dropping out!
If the bearing parts are not screwed into place firmly enough, the door may drop out. This may lead to severe injuries. What is more, the door may not close and therefore the appliance may fail to cool properly.
▶ Screw on the bearing brackets/bearing pins tightly (4 Nm).
▶ Check all of the screws and retighten if necessary.

4.2 Insertion into a row of kitchen units

For appliances 600 mm wide

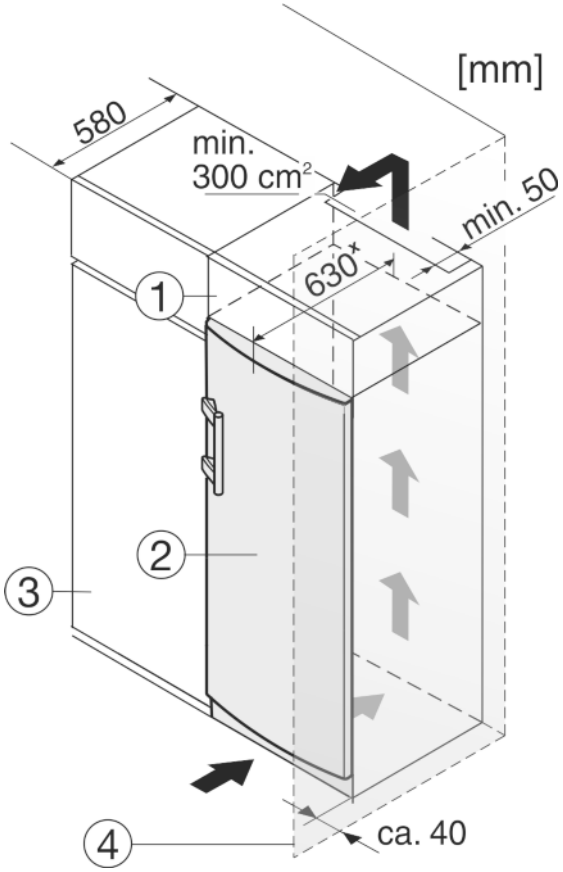

Fig. 10

(1) Stack cabinet
(2) Appliance
(3) Kitchen cabinet
(4) Wall

x For appliances supplied with wall spacers, the measurement increases by 35 mm (see 4.4) .

The appliance can be built into kitchen units. A top cupboard *Fig. 10 (2)* can be added above the appliance in order to bring the appliance *Fig. 10 (1)* up to the height of the fitted kitchen units.

When installing with kitchen units (max. depth 580 mm), the appliance can be positioned directly next to the kitchen cabinet *Fig. 10 (3)*. The appliance will project by 34 mmx at the sides and 50 mmx in the centre of the appliance in relation to the kitchen cabinet front.

Ventilation requirements:

- At the back of the stack cabinet there has to be a ventilation duct of at least 50 mm depth throughout the width of the stack cabinet.
- The cross section of the ventilation gap below the ceiling must be at least 300 cm².
- the larger the ventilation space, the more energy-saving the appliance is in operation.

If the appliance is installed with the hinges next to a wall *Fig. 10 (4)*, the distance between appliance and wall has to be at least 40 mm. This corresponds to the projection of the handle when the door is open.

4.3 Transporting the appliance

CAUTION
Risk of injury and danger of damage as a result of incorrect transport!
▶ Transport the appliance in a packed condition.
▶ Transport the appliance upright.
▶ Do not transport the appliance without assistance.

4.4 Installing the appliance

WARNING
Fire hazard due to dampness!
If live parts or the mains lead become damp this may cause short circuits.
▶ The appliance is designed for use in enclosed areas. Do not operate the appliance outdoors or in areas where it is exposed to splash water or damp conditions.

WARNING
Risk of fire due to short circuit!
If the mains cable/connector of the appliance or of another appliance touch the rear of the appliance, the mains cable/connector may be damaged by the appliance vibrations, leading to a short circuit.
▶ Stand the appliance so that it is not touched by connectors or main cables.
▶ Do not plug the appliance or any others into sockets located near the rear of the appliance.

WARNING
Fire hazard due to refrigerant!
The refrigerant R 600a is environmentally friendly but flammable. Escaping refrigerant may ignite.
▶ Do not damage the piping of the refrigeration circuit.

WARNING
Fire hazard and danger of damage!
▶ Do not place appliances emitting heat e.g. microwaves, toasters etc. on the appliance!

WARNING
Blocked ventilation openings pose a risk of fire and damage!
▶ Always keep the ventilation openings clear. Always ensure that the appliance is properly ventilated!

NOTICE
Risk of damage due to condensate!
▶ Do not install the appliance directly alongside a further refrigerator/freezer.

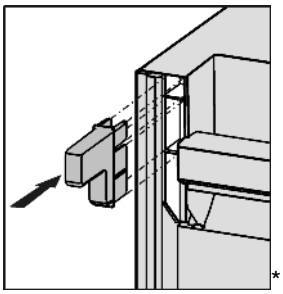

❑ In the event that the appliance is damaged, contact the supplier immediately before connecting to the mains.
❑ The floor at the site must be flat and level.

- ❑ Do not install the appliance in a location where it is exposed to direct radiation of the sun, next to a cooker, heater and similar.
- ❑ The ideal installation site is a dry, well ventilated room.
- ❑ Always stand the appliance backed directly to the wall using the enclosed wall spacers (see below).
- ❑ The appliance may be moved only when it is empty.
- ❑ Do not install the appliance without assistance.
- ❑ The more R 600a refrigerant there is in the appliance, the larger the room in which the appliance is standing needs to be. In rooms that are too small, a flammable mix of gas and air may be created if there is a leak. According to the EN 378 standard, every 11 g of R 600a refrigerant requires at least 1 m^3 space in the room for the appliance. The amount of refrigerant in your appliance is on the type plate inside the appliance.

▶ Detach the connecting cable from the rear of the appliance, removing the cable holder at the same time because otherwise there will be vibratory noise!
▶ Remove the protective film from the decorative trims.
▶ Remove all transit supports.

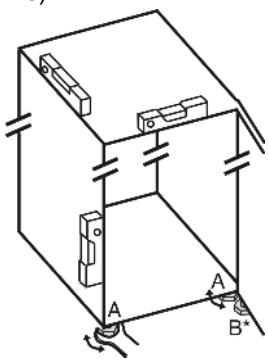

The spacers supplied with some appliances must be used to achieve the stated energy consumption. These will extend the depth of the appliance by approx. 35 mm. The appliance is fully functional if the spacers are not used, but does have a slightly higher energy consumption.*

▶ In the case of an appliance with enclosed wall spacers, mount the wall spacers on the back of the appliance at the top left and right.*

*

▶ Dispose of packaging material (see 4.5) .
▶ Align the appliance so that it stands firmly and on a level by applying the accompanying spanner to the adjustable-height feet (A) and using a spirit level.

Note
▶ Clean the appliance (see 6.2) .

If the appliance is installed in a very damp environment, condensate may form on the outside of the appliance.
▶ Always see to good ventilation at the installation site.

4.5 Disposing of packaging

WARNING
Danger of suffocation due to packing material and plastic film!
▶ Do not allow children to play with packing material.

The packaging is made of recyclable materials:

- corrugated board/cardboard
- expanded polystyrene parts
- polythene bags and sheets
- polypropylene straps
- nailed wooden frame with polyethylene panel*

▶ Take the packaging material to an official collecting point.

4.6 Connecting the appliance

NOTICE
Failure to connect properly
Damage to the electronics.
▶ Do not use a standalone inverter.
▶ Do not use an energy saving plug.

WARNING
Failure to connect properly
Fire.
▶ Do not use an extension cable.
▶ Do not use distributor blocks.

The type of current (alternating current) and voltage at the installation site have to conform with the data on the type plate (see Appliance at a glance).

The socket must be properly earthed and fused. The tripping current for the fuse must be between 10 A and 16 A.

The socket must be easily accessible so that the appliance can be quickly disconnected from the supply in an emergency. It must be outside the area of the rear of the appliance.
▶ Check the electrical connection.
▶ Plug in the power plug.

4.7 Switching on the appliance

▶ Press On/Off button *Fig. 3 (1)*.
▷ The appliance is switched on. The temperature display indicates the set temperature.
▷ If all LEDs in the temperature display light up, demo mode is activated. Please contact the after sales service.

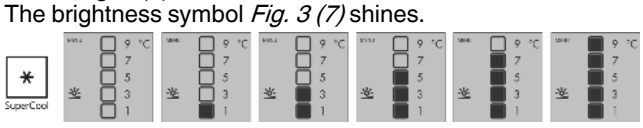

5 Control

5.1 Brightness of the temperature display

You can adjust the brightness of the temperature display to the light conditions of the room in which the appliance is installed.

5.1.1 Adjusting the brightness

The backlight can either be switched off or set to one of 5 levels. The backlight is switched off ex works.
▶ Activate setting mode by pressing the SuperCool button *Fig. 3 (2)* for approx. 5 sec.
▷ The menu symbol *Fig. 3 (9)* lights up and thebrightness symbol *Fig. 3 (7)* flashes.
▶ Confirm the brightness function: Briefly press the SuperCool button *Fig. 3 (2)*.
▷ The brightness symbol *Fig. 3 (7)* shines.

▶ Using the setting button *Fig. 3 (4)*, select either "off" or the brightness wanted. The more display fields of the temperature display that light up, the brighter it is. If no field is lit up, it means "off".
▶ Confirm by pressing the SuperCool button *Fig. 3 (2)*.
▷ The brightness symbol *Fig. 3 (7)* flashes.
▷ The brightness is adjusted to the new value.

▶ To deactivate the setting mode: Press the On/Off button *Fig. 3 (1)*.

-or-

▶ Wait for 5 minutes.

▷ The brightness symbol *Fig. 3 (7)* and the menu symbol *Fig. 3 (9)* go out.

▷ The temperature is indicated again in the temperature display.

5.2 Food refrigeration

Note

The energy consumption increases and the cooling performance decreases if the ventilation is inadequate.

▶ Always keep the air slits of the fan free.

▶ Store perishable food such as ready-to-serve dishes, meat products and sausages in the coldest zone. Place butter and preserves in the upper area and in the door (see Appliance at a glance).

▶ Use recyclable plastic, metal, aluminium and glass containers and cling film for wrapping.

▶ Always store liquids and food which is subject to odour or taste transfer in closed containers or cover them.

▶ Foods which give off a large amount of ethylene gas and delicate foods, such as fruit, vegetables, salad, should always be stored separately or wrapped so as not to reduce the storage life; e.g. do not store tomatoes together with kiwis or cabbage.

▶ Use the front area of the refrigerator compartment floor only for briefly putting down cooled products, e.g. when rearranging and sorting. However do not leave cooled products there otherwise they may be pushed back or tipped over when the door is closed.

▶ Do not store food too close together to enable good air circulation.

▶ To safeguard bottles from tipping over: move the bottle holder.

5.3 Setting the temperature

The temperature depends on the following factors:

- the door opening frequency
- the room temperature at the site where the appliance is installed
- the type, temperature and quantity of frozen food

Temperature setting to be recommended: 5 °C

The temperature can be changed continuously. Once the 1 °C setting is reached, it starts again with 9 °C.

▶ To access temperature adjustment: press the setting button *Fig. 3 (4)* once.

▷ The LED of the current temperature flashes in the temperature display.

▶ Press the setting button *Fig. 3 (4)* the number of times needed until the required temperature shines in the LED display.

Note

▶ Long pressing of the setting button sets a slightly colder value within a small temperature range (e.g.: between 5 °C and 7 °C). The LED of the next lower temperature range then shines in the temperature display.

5.4 SuperCool

With SuperCool you switch to the highest cooling performance to reach lower cooling temperatures. Use SuperCool, to rapidly cool large amounts of food.

When SuperCool is activated, the fan* may run. The appliance operates with maximum cooling performance, which means that the noise of the refrigeration unit may be temporarily louder.

When SuperCool is activated, the appliance operates with maximum cooling performance. The noise of the refrigeration unit may be temporarily louder as a result.

The SuperCool function uses slightly more energy.

5.4.1 Cooling with SuperCool

▶ Briefly press SuperCool button *Fig. 3 (2)*.

▷ The SuperCool symbol *Fig. 3 (6)* lights up in the display.

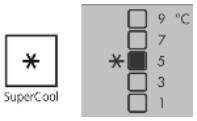

Fig. 11

▷ The cooling temperature drops to the coldest value. SuperCool is activated.

▷ SuperCool is automatically deactivated after 6 to12 hours The appliance continues to operate in the energy-saving, normal mode.

5.4.2 To prematurely deactivate SuperCool

▶ Briefly press SuperCool button *Fig. 3 (2)*.

▷ The SuperCool symbol *Fig. 3 (6)* goes out in the display.

▷ SuperCool is deactivated.

5.5 Fan

With the fan you can rapidly cool large quantities of fresh food or achieve a relatively even distribution of temperature across all the storage levels.

The forced-air cooling is to be recommended:

- at high room temperature (above33 °C)
- at high humidity

The forced-air cooling uses slightly more energy. To save energy, the fan switches off automatically when the door is open.

5.5.1 Switching on the fan

▶ Briefly press the fan button *Fig. 3 (5)*.

▷ The fan symbol *Fig. 3 (8)* shines.

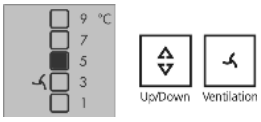

Fig. 12

▷ The fan is active. In some appliances, the fan is only activated when the compressor is running.

5.5.2 To switch off the fan

▶ Briefly press the fan button *Fig. 3 (5)*.

▷ The fan symbol *Fig. 3 (8)* goes out.

▷ The fan is switched off.

5.6 Shelves

5.6.1 Moving or removing shelves

The shelves have stops preventing them from being unintentionally pulled out.

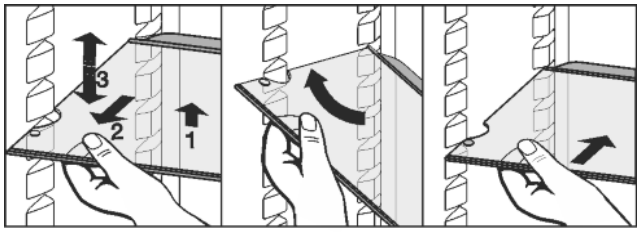

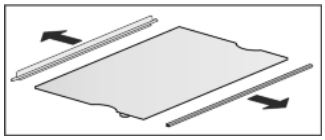

Fig. 13

- ▶ Lift the shelf slightly and pull forward a little.
- ▶ Adjust the height of the shelf. To do so, push the cut-outs along the supports.
- ▶ In order to remove the shelf fully, place it at a slant and pull out towards the front.
- ▶ Insert shelf with the raised edge pointing upwards at the back.
- ▷ The food does not freeze onto the rear wall.

5.6.2 Dismantling shelves

- ▶ The shelves can be dismantled for cleaning.

5.7 Using the sectioned shelf

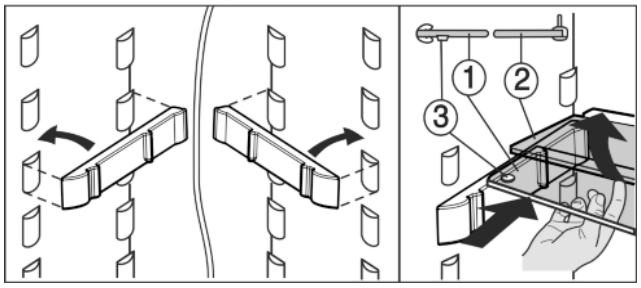

Fig. 14

- ▶ The glass shelf with stop face (2) has to be at the back.
- ▶ The glass plate (1) with pull-out stops must be at the front so that the stops (3) face downwards.

Adjusting the height:

- ▶ Pull the glass plates out forwards one by one.
- ▶ Remove the support from the catch mechanism and click into place at the required height.

Using both shelves:

- ▶ Lift the top glass plate and pull the bottom glass plate forwards.

5.8 Door racks

5.8.1 Moving the storage rack

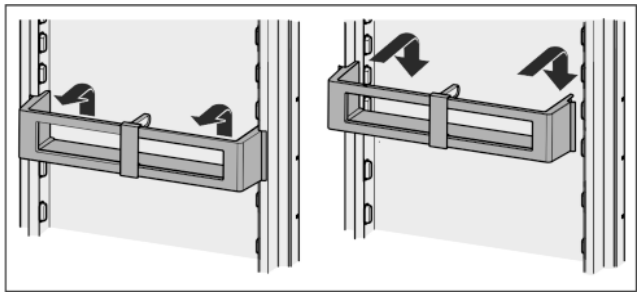

Fig. 15

5.8.2 Dismantling door racks

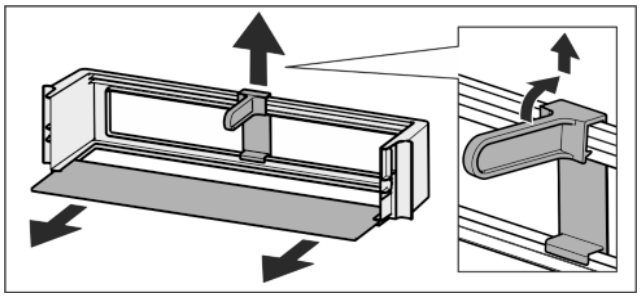

Fig. 16

- ▶ The door racks can be dismantled for cleaning.

6 Maintenance

6.1 Defrosting

6.1.1 Defrosting refrigerator compartment

The refrigerator compartment is defrosted automatically. The water evaporates. Drops of water on the rear wall are functionally conditioned and perfectly normal.

- ▶ Clean the drain hole at regular intervals to allow the defrost water to drain (see 6.2) .

6.2 Cleaning the appliance

WARNING
Risk of injury and damage as a result of hot steam!
Hot steam can lead to burns and can damage the surfaces.

- ▶ Do not use any steam cleaners!

NOTICE
Incorrect cleaning damages the appliance!

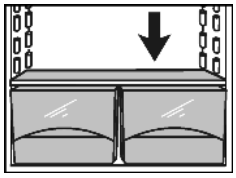

- ▶ Do not use cleaning agents in concentrated form.
- ▶ Do not use any scouring or abrasive sponges or steel wool.
- ▶ Do not use any sharp or abrasive cleaning agents, nor any that contain sand, chloride or acid.
- ▶ Do not use chemical solvents.
- ▶ Do not damage or remove the type plate on the inside of the appliance. It is important for the customer service.
- ▶ Do not pull off, bend or damage cables or other components.
- ▶ Do not allow any cleaning water to enter the drain channel, ventilation grille or electrical parts.
- ▶ Please use soft cleaning cloths and a universal pH-neutral cleaning agent.
- ▶ Please use cleaning and care products suitable for contact with foodstuffs in the appliance interior.

- ▶ **Empty appliance.**
- ▶ **Pull out the power plug.**

- ▶ Clean **plastic outer and inner surfaces** with lukewarm water and a little washing-up liquid.
- ▶ Only use a soft clean cloth to wipe **side walls with a paint finish**. In the case of heavy soiling, use lukewarm water with neutral cleaning agent.
- ▶ Use only a soft clean cloth to wipe **door surfaces** with a paint finish. In the case of heavy soiling, use a little water or neutral cleaning agent. A micro-fibre cloth can be used optionally.

▶ Clean **drain hole**: Remove deposits with a narrow instrument, e.g. a cotton bud.

▶ Clean **items of equipment** by hand with lukewarm water and a little washing-up liquid.

After cleaning:

▶ Wipe dry the appliance and items of equipment.
▶ Connect the appliance and switch it on again.
▶ Put the food back inside.

6.3 Replacing the interior illumination with LED lamp

In the device, an LED lamp is used as standard illumination for the interior space.

When an incandescent bulb is used:

❑ Use an incandescent lamp with max. 15 W and E14 socket.
❑ Power supply (AC) and voltage at the operating point must comply with the details on the rating plate (see Appliance at a glance).

When a LED is used:

❑ Use only the original LED lamp from the manufacturer. The lamp can be obtained through customer service or a specialist dealer (see 6.4) .

WARNING
Risk of injury from LED light!
The light intensity of the LED lighting corresponds to laser class 1/1M.
If the cover is removed:
▶ Do not look directly into the light at close quarters through optical lenses. Doing so may damage your eyes.

WARNING
Fire hazard from the LED light!
If different LED lights are used, there is a danger of overheating or fire.
▶ Use the manufacturer's original LED light.

▶ Switch off the appliance.
▶ Pull out the mains plug or switch off/unscrew the fuse.
▶ Take hold of the lamp cover at the top and bottom *Fig. 17 (1)*.
▶ Disengage the lamp cover at the back and detach it *Fig. 17 (2)*.
▶ Replace the lamp *Fig. 17 (3)*.
▶ Clip the back end of the cover in and clip the sides into place.

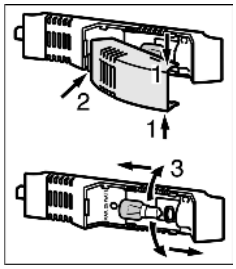

Fig. 17

6.4 Customer service

First check whether you can correct the fault yourself by reference to the list (see Malfunction). If this is not the case, please contact the customer service whose address is given in the enclosed customer service list.

WARNING
Risk of injury if repair work is not carried out professionally!
▶ Have any repairs and action - not expressly specified - on the appliance and mains cable carried out by service personnel only. (see Maintenance)

▶ Read the appliance designation *Fig. 18 (1)*, service No. *Fig. 18 (2)* and serial No. *Fig. 18 (3)* off the type plate located inside the appliance on the left-hand side.

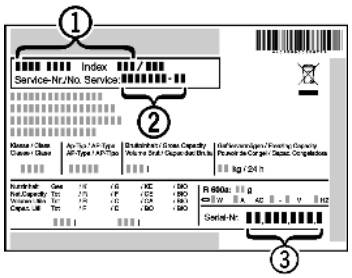

Fig. 18

▶ Notify the customer service, specifying the fault, appliance designation *Fig. 18 (1)*, service No. *Fig. 18 (2)* and serial No. *Fig. 18 (3)*.
▷ This will help us to provide you with a faster and more accurate service.
▶ Keep the appliance closed until the customer service arrives.
▷ The food will stay cool longer.
▶ Pull out the mains plug (not by pulling the connecting cable) or switch off the fuse.

7 Malfunctions

Your appliance is designed and manufactured for a long life span and reliable operation. If a malfunction nonetheless occurs during operation, check whether it is due to a handling error. In this case you will have to be charged for the costs incurred, even during the warranty period. You may be able to rectify the following faults yourself:

Appliance does not work.
→ The appliance is not switched on.
▶ Switch on the appliance.
→ The power plug is not properly inserted in the wall socket.
▶ Check power plug.
→ The fuse of the wall socket is not in order.
▶ Check fuse.

The compressor runs for a long time.
→ The compressor switches to a low speed when little cold is needed. Although the running time is increased as a result, energy is saved.
▶ This is normal in energy-saving models.
→ SuperCool is activated.
▶ The compressor runs for longer in order to rapidly cool the food. This is normal.

A LED on the bottom rear of the appliance (at the compressor) flashes regularly every 15 seconds*.
→ The inverter is equipped with a diagnostic LED.
▶ The flashing is normal.

Excessive noise.
→ Due to the various speed steps, speed-regulated* compressors can generate different running noises.
▶ The sound is normal.

A bubbling and gurgling noise.
→ This noise comes from the refrigerant flowing in the refrigeration circuit.
▶ The sound is normal.

A quiet clicking noise.
→ The noise is produced whenever the refrigeration unit (motor) automatically switches on or off.

*** Depending on model and options**

▶ The sound is normal.

A hum. It is briefly a little louder when the refrigeration unit (the motor) switches on.

→ The refrigeration increases automatically when the SuperCool function is activated, fresh food has just been placed in the appliance or the door has been left open for a while.

▶ The sound is normal.

→ The ambient temperature is too high.

▶ Solution: (see 1.2)

A low hum.

→ The sound is produced by air flow noise of the fan.

▶ The sound is normal.

Vibratory noise.

→ The appliance is not fixed to the ground. The running of the cooling unit therefore makes objects and adjacent furniture vibrate.

▶ Adjust appliance via the height-adjustable feet.

▶ Move bottles and containers apart.

DEMO shines in the temperature display.

→ The demo mode is activated.

▶ Please contact the after-sales service (see Maintenance).

The outer surfaces of the appliance are warm*.

→ The heat of the refrigeration circuit is used to prevent condensate from forming.

▶ This is normal.

The temperature is not cold enough.

→ The door of the appliance is not properly closed.

▶ Close the door of the appliance.

→ Insufficient ventilation.

▶ Keep ventilation grille clear, and clean it.

→ The ambient temperature is too high.

▶ Solution: (see 1.2) .

→ The appliance was opened too frequently or for too long.

▶ Wait to see whether the appliance reaches the required temperature by itself. If not, please contact the after sales service (see Maintenance).

→ The appliance is too close to a source of heat (stove, heater etc).

▶ Change the position of the appliance or the source of heat.

The internal light does not come on.

→ The appliance is not switched on.

▶ Switch on the appliance.

→ The door was open longer than 15 min.

▶ The interior light automatically switches off if the door has been open for about 15 min.

→ When the interior illumination does not work but the temperature display is lit, the illuminant (delivery with LED illuminant) is defective.

WARNING

Risk of injury from LED light!

The light intensity of the LED lighting corresponds to laser class 1/1M.

If the cover is removed:

▶ Do not look directly into the light at close quarters through optical lenses. Doing so may damage your eyes.

▶ Change the lighting (see Maintenance).

8 Decommissioning

8.1 Switching off the appliance

EN

▶ Press the On/Off button *Fig. 3 (1)* until the display goes dark. Release button.

▷ If the appliance cannot be switched off, the child lock function is active .

8.2 Taking the appliance out of service

▶ Empty the appliance.

▶ Remove mains connector.

▶ Clean the appliance (see 6.2) .

▶ Leave the door open to prevent odour.

9 Disposing of the appliance

The appliance contains some reusable materials and should be disposed of properly - not simply with unsorted household refuse. Appliances which are no longer needed must be disposed of in a professional and appropriate way, in accordance with the current local regulations and laws.

When disposing of the appliance, ensure that the refrigeration circuit is not damaged to prevent uncontrolled escape of the refrigerant it contains (data on type plate) and oil.

▶ Disable the appliance.

▶ Pull out the plug.

▶ Cut through the connecting cable.
