Highlights

Active noise cancelation

With Noise Canceling technology, you can listen to music on the go without being affected by ambient noise. Earphone microphones detect ambient noise where it impacts you most and then a digital signal processor creates the necessary equal but opposite waveform to effectively cancel out the unwanted noise, thus bringing you closer to silence. The earphones' special design also provides exceptional sound isolation and a choice of three interchangeable ear caps to ensure a perfect fit.

Rhapsody and Audible

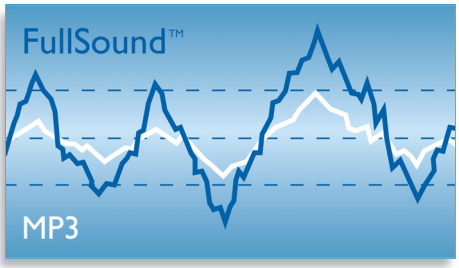

Enjoy the best audio content on your Philips GoGear with Rhapsody and Audible. The Rhapsody online music service gives youaccess millions of full-length, CD-quality tracks from different genres. Rhapsody lets you discover loads of music with guides and recommendations, and a unique channel feature. Audible offers over 75,000 audio programs from leading audiobook publishers, broadcasters, entertainers, magazine and newspaper publishers, and business information providers. Choose from a monthly plan or buy content a-la-carte to take with you on your GoGear.

SuperScroll™

Double action search keys allow easy speed control when scrolling through large libraries. You can choose to move through your playlist one song or video at a time or just press and hold down a little harder to SuperScroll™ swiftly to your desired file.

FullSound™

Philips' innovative FullSound technology faithfully restores sonic details to compressed MP3 music, dramatically enriching and enhancing it, so you can experience CD music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed MP3 music in true-to-life sound that will touch your soul and move your feet.
