MPN: METHANOL-CARTRIDGE-EFOY-28L

EFOY Methanol Energy Cartridge 28l - METHANOL-CARTRIDGE-EFOY-28L

EFOY Fuel Cartridges

Away from a mains supply for weeks at a time! EFOY fuel cartridges are a safety-tested fuel system that was specially developed for EFOY fuel cells. EFOY fuel cartridges can be changed in seconds. It is a simple and clean process. With a M10 fuel cartridge, you could be on the road for up to 4 weeks without a mains supply. This means that with a single M10 fuel cartridge you can use your notebook to plan 1.000 outings, you can enjoy 700 cups of coffee from your automatic coffee maker, you can transmit 550 hours of radio messages from your boat or you can eat 800 slices of fresh toast ... and all this fully independent of the mains supply. Enjoy the freedom.

Power anytime and anywhere – EFOY fuel cartridges keep you mobile! The practical EFOY cartridges contain the fuel for EFOY fuel cells. EFOY fuel cartridges have been designed especially for safe, convenient operation of EFOY fuel cells.

Cartridges are available in 10-liter, 28-liter and 60-liter sizes. Additional sizes for industrial or portable applications are available upon request.

Why can I only use EFOY fuel cartridges with EFOY fuel cells?

EFOY fuel cartridges contain ultra-pure fuel that has been specially conceived for EFOY fuel cells. SFC has tested the fuel and it carries a molecular purity guarantee. Constant testing provides a safeguard for consistently high quality.

Only original EFOY fuel cartridges may be used on EFOY fuel cells in order to avoid irreversible damage to the unit by invisible chemical impurities such as sulfur, chlorine, sodium, etc. The warranty does not cover damage caused by the use of contaminated fuels!

Be sure to look for the “Ultra-Pure” seal on every EFOY fuel cartridge!

Tested and proven Security!

Every SFC fuel cartridge carries the TUEV safety seal. SFC fuel cartridges have always been subject to the most stringent safety standards. The containers consist of highly impact-resistant plastic. Containers are subjected to numerous drop and shock tests and have continuously demonstrated a high level of security in these tests.

SFC fuel cartridges are equipped with a safety valve to prevent leakage. The valve will only open if the fuel cartridge is connected to an SFC fuel cell. If the fuel cartridge is removed, the safety valve will hermetically seal ensuring that the user never comes into contact with methanol. This method of fueling is far safer, cleaner and more convenient than gasoline-powered generators.

Specifications

Legal Information	**Country of Origin**	Germany
	Tariff No.	2905120090
Package dimensions	**Gross Weight (Package, kg)**	24.5 kg

Product dimensions	**Net Weight (Product, kg)**	24.5 kg
Vendor information	**Brand Name**	Ernitec
	Warranty	1 Year(s)
