

Philips

Cordless phone with answering machine

- 25-min answering machine
- 1.6" display/blue backlight
- Handset speakerphone

D1261B/38

Simply Hands-free

A compact phone with excellent sound reproduction for you to talk completely hands-free. Ergonomically designed to have all the essential functions including an in-built answering machine, this plug & play device makes calling your loved ones

Benefits

Nice and simple

- Caller ID – so you always know who is calling*
- Ultimate convenience through easy setup
- Freestanding handset with a speaker for easy hands-free calls
- Menu in multiple local languages
- Textured back cover for non-slip grip
- Up to 10 hours' talk time on a single charge
- Up to 25 minutes of messages on your answering machine
- Easy to read 1.6" (4.1 cm) display with backlight

Crystal clear sound

- Advanced sound testing and tuning for superb voice quality
- Automatic Volume Control offsets unwanted volume variation
- Optimised antenna layout for great reception in any room
- The Parametric Equaliser delivers pure and clear sound

Eco-conscious product

- Low radiation and power consumption

Features

Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction for both handset and hands-free modes.

PHILIPS

Automatic Volume Control

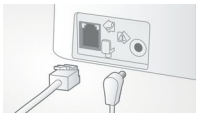

Automatic Volume Control offsets variations in sound signal, which can be caused by distance, signal strength or the caller's phone — so what you hear always remains consistent. Reducing the audio amplification for strong signals, and increasing it for weak ones, means you can enjoy a smooth conversation without unwanted sound volume variation.

Caller ID*

Sometimes it's good to know who's calling before you answer. And our Caller ID lets you keep track of who's on the other end of the line.

Easy setup

Ultimate convenience through easy set up. Simplified installation - Plug and Play product

Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

Handset speakerphone

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Menu in local languages

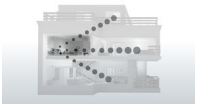

Enjoy easy setup, navigation and control with intuitive menu available in local languages.

Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

Optimised antenna layout

Our optimised antenna layout ensures strong and stable reception, even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

Parametric Equaliser

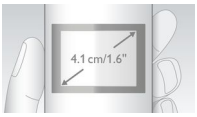

Our telephones use parametric equalisation in the digital sound processing to fine tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Up to 10 hours' talk time

Up to 25 min. recording

4.1 cm (1.6") display
