PHILIPS
sense and simplicity

# Highlights

### 16 million colours

Seven state-of-the-art LEDs create millions of colours, including white light.

### Adjust coloured and white light

Change colour, dim or adjust intensity of coloured light, dim white light. And pick the best combination of the two.

### Adjust one light or all

When connected to other Philips LivingAmbiance products, you can change colour, dim or adjust intensity of coloured light luminaires and dim white light luminaires.

### Automatic colour changing mode

To select automatic colour changing, sweep your finger around the colour wheel and press the 'I' button. Adjust the speed of colour changing by selecting a colour – from blue for just 5 seconds to purple for a full hour.

### Dimming and colour intensity

Adjust the brightness to suit your mood. Add more white to the colour to get perfect subtle shades.

### Easy to use remote control

Simply touch to change colour, dim or adjust colour intensity to get your favourite setting.

### High-quality white light

High-quality halogens give warmer light when dimmed.

### One remote for all lights

All of the LivingAmbiance products work together via the same intuitive remote control with which you can dim or change the colour of your lights – individually or together – in any combination you please. You can see which products work together by looking at the box or the product itself. If there is a SmartLink logo, it means the product will work with other SmartLink products.

### Recall your scene with a touch

Press one of the three scene buttons to recall your saved lighting settings.

### Store 3 lighting scenes

Set each luminaire, or a combination of luminaires, to your preferred setting. Press and hold one of the scene buttons to store it.
