Ortronics

Three Jumper OS2 Reference Cable MDC Test Kit

Part No. MDC-TEST-KIT-OS2

The OS2 Three Jumper MDC Test Reference Kit is engineered to test installations when test equipment does not have the updated MDC adapters and software for one jumper reference testing. This is also designed to test acclAIM installations. Input Connector: LC Simplex, Output Connector: SC Simplex. Note: Required factory test reference cords for one jumper reference are sold separately.

Features & Benefits

Compatibility: This kit enables compatibility with Fiber test equipment that does not have MDC connectivity.

Ready to Test: Each Kit has been cleaned and inspected from the factory
