Mobile signage cart - 32

SPM147-32

The Mobile signage cart, SPM147 is a rolling mounting solution designed for larger screens, which can be useful for various applications, such as training presentations, trade shows, or mobile displays.

Whilst being a mobile display solution, this is a very stable and sturdy solution. The base of the Mobile Signage Cart is capable of hiding cabling, power bricks, media players, and other accessories. This can help maintain a neat and organised appearance while also minimising the risk of tripping over cables and other components.

The SPDS2117 and SPDS2107 complements the SPM147 by providing VESA mounting options for a wider range of displays (VESA 200, 300 and 400)

Rolling mounting solution supporting screen sizes of 15”, 17”, 19”, and 21”
Base capable of concealing cables, power bricks, media players, and other accessories
VESA 100 x 100 mounting standard
Single-sided screen setup for optimal visibility 5-year warranty

Product Specifications

Colour Name	White
