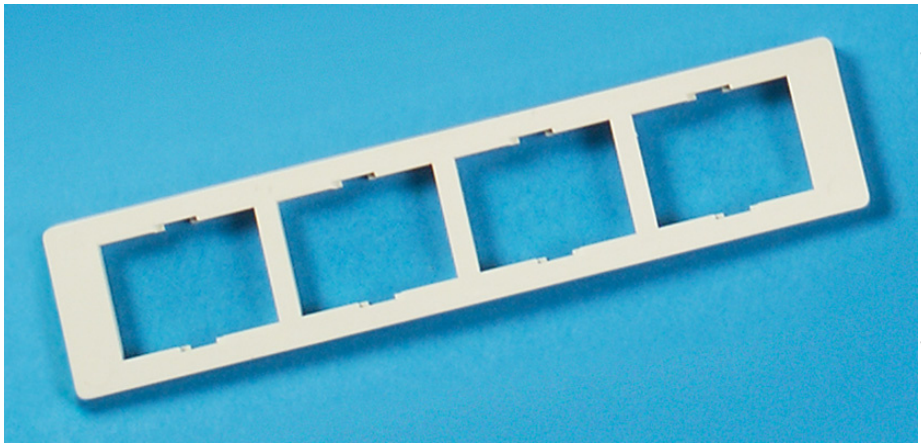
Ortronics

Fib-Or-Cop II Bottom Plate For 4 Tracjacks, 5 Pack

Part No. 62100037



Requires 62100040 or 62100041. Fib-or-Cop II provides greater multimedia capacity, addressing the increasing need for fiber in horizontal cabling systems. This larger version of the Fib-or-Cop has the ability to mount six TracJack Registered or three Series II Registered modules in the face, with a choice of fiber (LC, SC, ST or MT-RJ) and/or copper (TracJack) exiting from the bottom. This design allows the cover to be removed without disrupting the connections in the faceplate. The wide variety of connectors located in the bottom positions can be further protected by an optional snap-on shroud. In addition, the Legrand Registered line of workstation solutions offers many alternative designs to accommodate multimedia needs for in-wall and surface mount installations. Quick and reliable data center installations are a SNAP Trademark with this innovation from Legrand Registered. In today's workplace, where network downtime is costly and detrimental to any business or organization, bringing a new data center online must be completed as quickly as possible. Quick and easy installations that guarantee reliable performance are more critical than ever. Clarity Registered SNAP Pre-Terminated Copper Cabling System offers the above-the-standards performance of Clarity connectivity in a custom terminated cable assembly system that's ready to plug and go. Its innovative modular design combines high performance and installer friendly features with the quick deployment and reliability of a factory terminated and tested cabling system.

Features & Benefits

- Part of Fib-or-Cop Workstation family
- Accepts (4) TRACJACK modules
- Field configurable

Specifications

General Info

Product Family / Series / Group	Clarity TracJack	Product Line	Ortronics
Color	Fog White	UPC Number	662875425618
Country Of Origin	Taiwan, Province Of China	Product Type	Adapter Panel
Features	Snap In	Housing Color	Fog White
Application Sector	Commercial	Standard	UL Standard

Warranty Type	5-Year

Dimensions

Product Width US	4.66 in	Product Depth US	0.13 in
Product Height US	1.0 in		

Technical Information

Compatibility	Series II, TracJack	Single/Multimode	Non-applicable
