- Rotate to dim and brighten easily
- Use as a remote or mount to the wall
- Control multiple Rooms or Zones

Issue date: 2026-08-05 Version: 0.247

Highlights

Control it your way

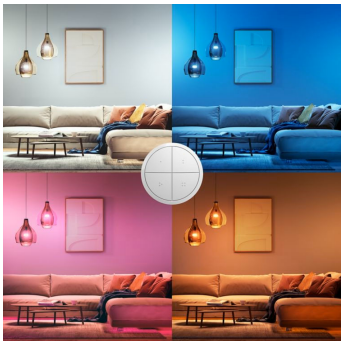

Connect your Philips Hue lights with the bridge and start discovering the endless possibilites. Control your lights from your smartphone or tablet via the Philips Hue app, or add switches to your system to activate your lights. Set timers, notifications, alarms, and more for the full Philips Hue experience. Philips Hue even works with Amazon Alexa, Apple Homekit and Google Home to allow you to control your lights with your voice.

Convenient versatility

Control your entire smart lighting system from anywhere in your home — without your phone or tablet.

Set scenes instantly

With a sleek, matte design in both black and white, the Philips Hue Tap dial switch lets you set scenes in any room of your home. Program each button to control 3 separate Rooms or a Zone — and choose a scene for each.

Use it your way

Mount the Tap dial switch to the wall with its adhesive backing, attach it to any magnetic surface, or remove it from the wall plate and use anywhere in your home as a remote control.

Personalize each button

Choose a separate Room or Zone (as well as a light scene!) for each button in the Settings tab of the Hue app.

Rotate to dim and brighten easily

For precise lighting levels, turn the dial slowly to dim or brighten in smaller increments. Turn it faster to quickly brighten or dim the room.

Use as a remote or mount to the wall

Attach the Tap dial switch to the wall with its adhesive backing, place on any magnetic surface, or simply remove it from the wall plate to use as a remote control.

Control multiple Rooms or Zones

Let each button on the switch control up to three different Rooms or a Zone with its own individual scene, whether it's preset or made by you.
