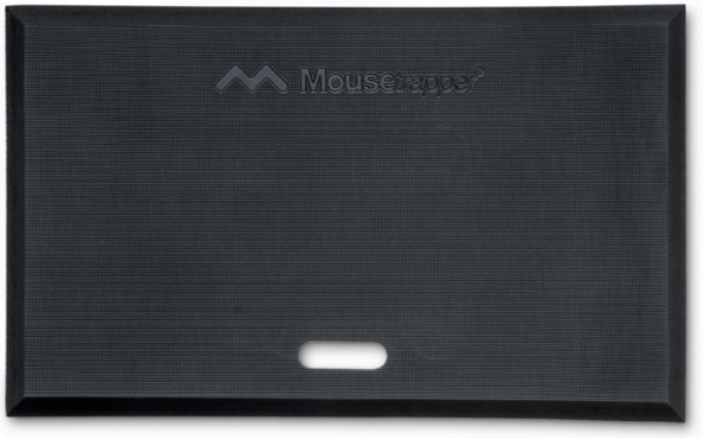
# Active XL



---

Active XL is an ergonomic standing mat designed to support natural movement during standing work – now with a larger surface for increased freedom and flexibility.

## Benefits of Active XL

The expanded standing area gives you more room to shift your stance, adjust your position and move naturally throughout the workday. The softly contoured surface encourages subtle movements that help reduce fatigue in feet and legs, while supporting a more dynamic standing posture.

Active XL offers the same comfort and stability as Active, with extra space to support longer standing sessions and greater freedom of movement.

## Facts

- Width: 550 mm
- Length: 850 mm
- Height: 18 mm
- Weight: 1327 g
