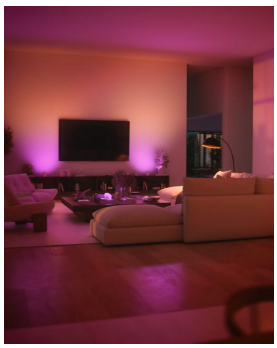
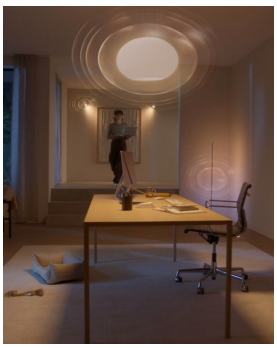
Highlights

Whole-home control from anywhere



The Bridge and Bridge Pro give you access to your smart home system from anywhere via the Hue app. Control your lights, receive security notifications — or just set up your system to run on a schedule with automations.

Hue MotionAware™

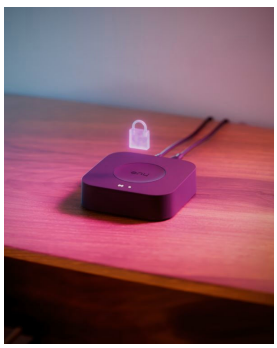


This exciting new feature exclusive to Bridge Pro empowers your lighting system to intuitively respond to your movements around the home. Using at least 3 lights in the same room, you can create a motion area that detects your presence and triggers any lights you assign to it. No separate motion sensor needed!

More capacity, faster processor

Compared with Bridge, the Bridge Pro brings 3x more capacity, support for 150+ lights, 50+ accessories, 500 scenes, plus 5x faster response times with its new Hue Chip Pro.

Zigbee security



Your privacy is our priority. Zigbee and Philips Hue prevent unauthorized access to your smart light ecosystem.
