TiLED™ dvLED UNIVERSAL TRIM KITS

TURN UNFINISHED EDGES INTO A POLISHED VIDEO WALL

CLEAN, FINISHED PERIMETER

The TiLED™ Universal Trim System creates a polished video wall by covering exposed edges and visible cabling. Smooth, enclosed edges eliminate sharp metal and deliver a clean, professional finish on all sides of the display.

EASY AND PREDICTABLE INSTALLATION

Designed for speed and consistency, trim installs after dvLED panels are mounted, with no field cutting required. This modular solution allows installers to mix & match pieces to accommodate various video wall configurations. Trim covers attach directly to wall-mounted subassemblies, reducing install time and improving predictability on site.

POST-INSTALL FLEXIBILITY

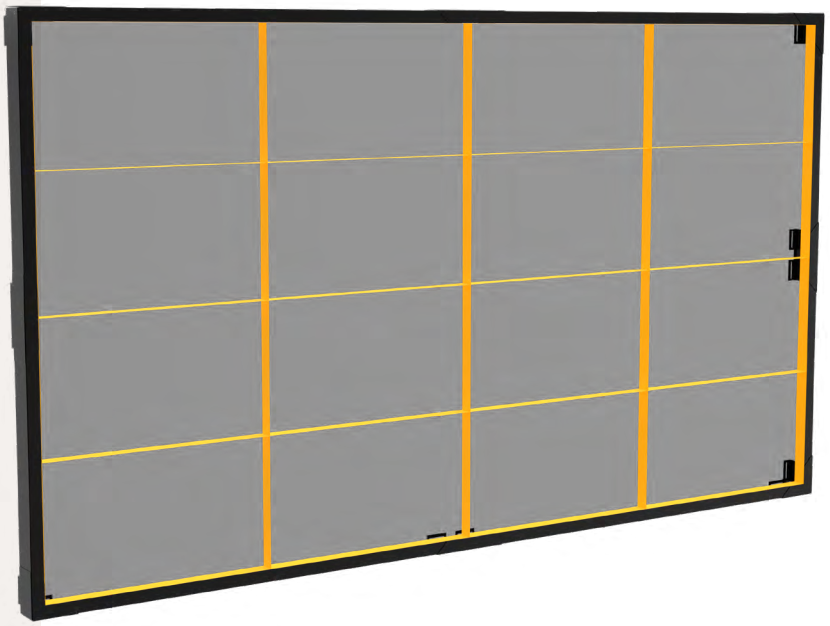
By installing after the dvLED panels are mounted, the trim system allows final adjustments to be made without impacting panel alignment, helping ensure a clean, finished look without rework.

UNIVERSAL FIT AND AVAILABILITY

The trim system accommodates common dvLED cabinet depths and is compatible with the TiLED mounting ecosystem, plus other third-party and OEM mounts with depths of 3" to 5.25" (76.2 to 133.35mm). Stocked SKUs are available off the shelf, eliminating custom lead times and simplifying project planning.

THERMAL MANAGEMENT
Vented top and bottom trim pieces promote passive airflow

CORNER KITS
Clean inside and outside corners, no cutting required



MODULAR DESIGN
Side, top, bottom, seam, and corner components

FLEXIBLE BUYING OPTIONS:

Available as individual pairs/ corner kits/seam covers and as preconfigured kits for common **27" cabinet** layouts (**4x4**, **5x5**, **6x6**, **8x4**, **8x8**)
