- 20-track CD programmable
- CD Shuffle/Repeat for personalised music enjoyment
- MP3 Link for portable music playback
- ID3 Tag Support for track information during CD playback
- Handy remote control for extra convenience

PHILIPS

Highlights

Dynamic Bass Boost

Dynamic Bass Boost maximises your music enjoyment by emphasising the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

USB Direct

With the USB Direct mode, simply plug in your USB device to the USB port on your Philips device and your digital music will be played directly from the Philips device.

MP3 Link

The MP3 link connectivity allows direct playback of MP3 content from portable media players. Besides the benefit of enjoying your favourite music in the superior sound quality delivered by the audio system, the MP3 link is also extremely convenient as all you have to do is to plug your portable MP3 player into the audio system.

Handy remote control

With a handy remote control for greater convenience at your fingertips, all you have to do is sit back and relax.

ID3 Tag Support

Players with ID3 Tag Support have an LCD screen that displays a text readout of the artist name and the title of the track currently being played so you can easily identify songs on your player. They show both numerical and text information in an easy-to-read format allowing you to conveniently view the artist name and track title. ID3 Tag Support lets you quickly and easily identify and navigate through the large number of files on your MP3-CD or WMA-CD.
