• Limited edition in Malaysian oak wood finished speaker

Advanced versatility

• Stream music with AirPlay wireless technology

Intuitive control

• SoundStudio app for complete control of audio settings
• Stream millions of songs to your speakers with Spotify

PHILIPS

Features

SoundSphere

Bask in the glory and energy of music as SoundSphere gives you each note as the artist intended. Delivering clear and natural audio, SoundSphere creates a sound impression that is deeper and wider. The result is life-like audio that will make you believe the artists are performing in front of you. Each SoundSphere speaker features a tweeter that hangs above the speaker box. The tweeter is able to emit sound more clearly and in all directions. Precise audio crossover engineering and careful positioning of the woofer to embrace the tweeter ensures minimised interference and even more natural sound.

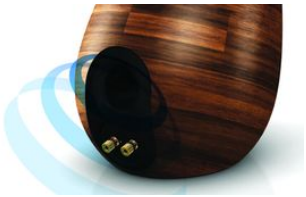
FullSound™

Philips' proprietary FullSound technology uses latest-generation Digital Signal Processing to faithfully enhance music rendering. Music content is dynamically analysed and optimised to let you experience music with great detail and warmth.

SoundCurve

The carefully designed curved back cover of this Philips docking speaker creates a highly effective acoustic structure for sound reproduction. Its clean curve enforces the rigidity of the speaker cabinet, dramatically reducing internal resonance and eliminating the vibration and distortion of sound. You get to enjoy superb crystal-clear sound in stunning-looking speakers.

Bass-reflex design



Bass-reflex acoustic load uses a bass pipe tuned to the acoustic volume of the speaker box, in order to reproduce deep bass from compact enclosures. The carefully designed profiled bass-pipe helps air flow and allows for deep and impactful bass, even at loud volumes while minimising air turbulence that may cause distortion.

Real hand-crafted wood speaker

Wood has been used throughout history to craft the finest musical instruments. Its natural acoustic properties continue to make it the material of choice for the best instruments and sound equipment today. Not only is this speaker handcrafted in wood, advanced wood bending techniques have been applied to create the right curvature for the enclosure. The calculated curve reduces vibration and eliminates the distortion of sound, resulting in the delivery of natural, life-like audio.

AirPlay wireless technology

AirPlay lets you stream your entire iTunes music collection to your Fidelio docking stations. It plays wirelessly from the iTunes program on your computer, iPhone, iPad or iPod Touch to any AirPlay-enabled speaker in your home. All you have to do is ensure your speakers are connected to your Wi-Fi network. AirPlay also lets you play simultaneously on every speaker in every room. Make your favourite tunes follow you into whichever room you go.

SoundStudio App

Have music the way you like it now. SoundStudio truly puts the power over your music into the palm of your hands. It lets you change every aspect of sound, using only your iPhone, with controls that are intuitive and simple. Now you can tweak, tailor and create your desired sound experience and have your favourite songs come to new life. SoundStudio also lets you listen to thousands of Internet radio stations worldwide, broadening your music experience even further.
