- Easy shirt ironing: unique ShoulderWing System
- 3D textile for enhanced steam flow and faster ironing

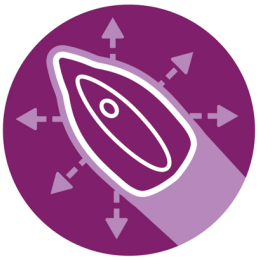
*10% wider steam distribution with PerfectFlow
**From previous version of GC260
***78% noise reduction in sound versus multilayer board cover

# Highlights

## 1 kg Lighter

The ironing board is now 1 kg lighter compared to the previous version for more convenient movement before your ironing session

## Wider steam distribution



The PerfectFlow layer gives 10% wider steam distribution for faster ironing

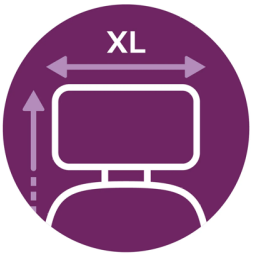
## Clothes hanger

No need to look for a place around you to hang your freshly ironed shirts. You can hang garments directly after ironing on the convenient hanging rail.

## Transport lock and feet caps

Transport lock prevents accidental collapsing of the board during ironing and also keeps the board closed during storage. The ironing board is supported by a double-leg construction with anti-slip feet caps that provides extra stability.

## XL Board and XL Tray



Iron more in one go with the Philips XL board shape (120 x 45 cm). It is also ideal for ironing big items such as bed linen and tablecloths. The stable and extra-large iron tray is perfect for steam generators. It is also heat resistant and can be safely used with steam irons.

## Ironing with 78% less noise

The ironing experience is more convenient with the ironing board cover that provides quieter ironing with a 78% noise reduction in sound power versus a multilayer board cover

## AquaBlock anti-drip cover

AquaBlock is a unique technology that prevents condensed steam from dripping onto the floor, making this board cover the ideal ironing surface for steam generator irons.

## Unique ShoulderWing System

With the unique ShoulderWing system, shirt ironing is easier than ever. This innovative system helps you iron shirts with little rearranging, saving you time and effort. The retractable ShoulderWing System can be opened and closed, depending on the type of garment to be ironed.

## 3D Textile Technology

The new 3D textile layer enables the steam to flow inside the board cover thanks to the porous structure. This prolongs the contact of steam with the garments. And simply using the steam more efficiently means that the perfect ironing results are achieved even faster

# Specifications

## Safe ironing

Child lock: Yes
Transport lock: Yes
Anti-slip, protective feet cap: Yes

## Fast and convenient ironing

Suitable for: Steam generator irons, Steam irons
Height setting: 6 setting(s)
ShoulderWing System: Yes
Height adjustment: 70–94 cm
Shirt hanging rail: Yes
