KW 9200 MINI

Rechargeable multi-device compact keyboard with 2.4 GHz wireless, Bluetooth® 5.0 and cable connection

Models may vary from the image shown

With the KW 9200 MINI, CHERRY is introducing a top-class product that leaves nothing to be desired in terms of technical features, quality and design. The extra-slim keyboard in compact format is perfectly suited for various areas of application and a lifestyle on the move. If you want a compact keyboard that's as comfortable to use as a full size one, the KW 9200 MINI is the ideal choice. With four different transmission channels, the wireless multi-device keyboard is ready for flexible work in any application environment - whether private or professional.

The KW 9200 MINI fits into any bag, no matter how small, when being taken from one place to another. At the same time, this little gem comes with a protective carrying case made of recycled plastic.

Compatibility – a real all-rounder: There are virtually no limits when it comes to connecting the KW 9200 MINI to an end device. Thanks to its multi-device capability, the keyboard can be connected to up to four different end devices simultaneously via different channels. Using the F1-F4 keys, you can easily switch between the connection modes and control the desired device. Two channels are available in Bluetooth® mode. Whether with a desktop PC, laptop or tablet - the KW 9200 MINI works with practically any device that supports Bluetooth®.* For example, you can operate your laptop via the first Bluetooth® channel and in a matter of seconds switch to your tablet on the second Bluetooth® channel. For RF mode, simply plug the included nano receiver into a free USB port on your PC. Press F1 and you are directly connected. The included cable with USB-A/USB-C connector is not just for charging the integrated battery: Select cable mode on F4 to activate data transfer via the cable as well. It's perfect for environments where wireless transmission is not wanted. The mini keyboard is also very economical even in RF or Bluetooth® mode. One battery charge lets you work for weeks without recharging. Of course, you can carry on using the keyboard while it's charging.

Smart functions for more productivity: If you think the compact, minimalist design means you'll have to do without the advantages of a full-size keyboard, you couldn't be more wrong. The little all-rounder has plenty of useful functions up its sleeve. For example, you can access special functions such as picture or volume control by pressing the FN key. Multimedia functions such as play/pause and track selection haven't been forgotten either. If you want constant access to the special functions, simply press to lock the FN key. The integrated battery status display is extremely useful in everyday work. The wireless mini keyboard flashes its LEDs to indicate in good time when the lithium battery needs charging. The status LEDs integrated into the keys are also extremely useful. They show when the shift key or the FN lock key is activated. This makes annoying searching for active functions a thing of the past.

The recipe for success - the CHERRY SX scissor mechanism: Good typing characteristics are crucial for any keyboard. The CHERRY SX scissor action makes typing on the compact wireless keyboard a special highlight. The laptop-style keys are slightly concave, so your fingers find their way around them without you having to look. CHERRY's proprietary SX scissor technology provides a very quiet, precise typing experience and lets you glide your fingers effortlessly across the keys.

Minimalist look with ergonomic benefits: The KW 9200 MINI may be small - but it's still a full-fledged premium keyboard. Of course, it’s ideally suited for mobile use, but it also plays fully to its strengths on your work desk. Thanks to its compact dimensions, it takes up very little space to help you keep your desk nice and tidy. This even has ergonomic advantages: Compared to standard-sized keyboards, you mouse arm is closer to the keyboard. This automatically leads to a better shoulder posture and can counteract tension.

The KW 9200 MINI is perfect example of how design and function can complement each other perfectly. The wireless keyboard makes your desk look tidier and is 100% in keeping with the spirit of the times. The combination of ultra-slim dimensions and keys with a discreet red background looks elegant and modern at the same time. The minimalist design philosophy behind it extends to the packaging, which contains no plastic and is kept as small as possible.

*Supported operating systems: Windows, Android™, Chrome OS
*Battery life depends on individual use.

FUNCTION AND PERFORMANCE

- → 4 transmission channels: Two Bluetooth® 5.0 low energy channels, one 2.4 GHz wireless channel and one wired channel
- → Extra-small nano receiver for wireless operation
- → Removable USB-A to USB-C cable for data transfer and charging the lithium battery
- → AES-128 encryption in Bluetooth® and 2.4 GHz mode
- → Includes carrying case made of recycled plastic
- → Precise CHERRY SX scissor mechanism for an ideal operating feeling
- → Status LEDs show low battery and charging status
- → Status LEDs integrated directly in the CAPS LOCK, NUM and FN keys
- → Easy access to special functions via FN key
- → Color LEDs indicate selected connection
- → Durable key labels
- → Solid metal plate in keyboard
- → Stable, fold-out feet for height adjustment
- → Slim, extra-compact dimensions – ideal for out and about
- → Aesthetic statement with red keys and minimalist design
