Note:
[1] With scalable configurations of higher-performance CPUs and professional NVIDIA RTX GPUs, in addition to advantage of the same modern AI PC technology, AI-Ready workstation power the demanding AI consumption & development workflows.
[2] The processor determines the actual speed of the memory, thus the memory may actually work at a speed such as 5200MT/s, 4800MT/s, 4400MT/s, or lower. For processor-supported memory speed and frequency, please refer to the processor section of the ThinkStation PX Platform Specifications
[3] The max memory is based on the test results with current Lenovo memory offerings.
[4] Countries with input voltage under 110V, output power limited to 1500 watts. For more information about the ThinkStation PX Power Supply, please refer to ThinkStation PX Power Configurator. This document may be updated, so please check the latest version on Lenovo Support - Guides & Manuals.
[5] The system dimensions may vary depending on configurations.
[6] The system weight is approximate and based on results in Lenovo lab, which varies depending on the source of component, variance of the distribution of each component, and manufacturing process. It may not be the exact weight for each specific model.
[7] Intel vPro offers a superset of DASH's defined capabilities.
