

Cordless phone

- 25-min answering machine
- 1.6" display/amber backlight
- Speakerphone

D2051B/05

Talk Hands-free

Great sound reproduction, without having to hold the phone to your ear – so you can talk completely hands-free. A true plug-and-play device with a user-friendly menu and an inbuilt answering machine. A great chat has never been easier.

Benefits

Nice and simple

- Easy to read 1.6" (4.1 cm) graphical display with backlight
- Freestanding handset with a speaker for easy hands-free calls
- Menu in multiple local languages
- Programmable hot keys for quick dial
- Textured back cover for non-slip grip
- Up to 25 minutes of messages on your answering machine
- Up to 16 hours of talk time on a single charge
- Caller ID – so you always know who is calling*

Crystal clear sound

- Advanced sound testing and tuning for superb voice quality
- The Parametric Equaliser delivers pure and clear sound
- Optimised antenna layout for great reception in any room

Eco-conscious product

- Low radiation and power consumption

PHILIPS

Features

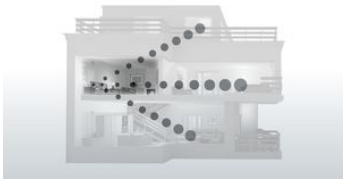
Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction for both handset and hands-free modes.

Parametric Equaliser

Our telephones use parametric equalisation in the digital sound processing to fine tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Optimised antenna layout



Our optimised antenna layout ensures strong and stable reception, even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

4.1-cm (1.6") graphical display

Handset speakerphone

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Menu in local languages

Enjoy easy setup, navigation and control with intuitive menu available in local languages.

Programmable hot keys

Now calling the people you care about most is easier than ever. With simple one-touch dialling, you will never have to search for their number again. You can programme up to 2 keys for instant calling.

Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

Up to 25 min. recording

Up to 16 hours talk time

Caller ID*

Sometimes it's good to know who's calling before you answer. And our Caller ID lets you keep track of who's on the other end of the line.

Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

Specifications
