Philips
Cordless phone with answering machine

25-min answering machine

1.8" display/amber backlight
Speakerphone
2 handsets

D4052W

Comfortable and convenient

With a curved shape for in-call comfort and the natural voice reproduction of HQ-Sound, relaxed conversations are effortless. Useful features like a large, full graphic display and backlit keypad make staying in touch even easier.

As convenient as it should be

- Large 4.6-cm (1.8") full graphical display
- Up to 25 minutes of messages on your answering machine
- Contoured handset design for in-call comfort
- Keypad backlight for fast access even in dark rooms
- Textured back cover for non-slip grip
- Up to 16 hours of talk time on a single charge
- Silence mode for more privacy
- Caller ID – so you always know who is calling*

Exceptional sound

- HQ-Sound: high quality acoustic engineering for superb sound
- Freestanding handset with a speaker for easy hands-free calls
- MySound profiles to match your sound preference

Eco-conscious product

- Low radiation (ECO and ECO+ modes) and power consumption

PHILIPS

Cordless phone with answering machine
25-min answering machine 1.8" display/amber backlight, Speakerphone, 2 handsets

D4052W/05

Highlights

4.6-cm (1.8") graphical display
Large 4.6-cm (1.8") full graphical display

Contoured handset design

Designed for maximum in-call comfort, the handset fits naturally against the curve of your face.

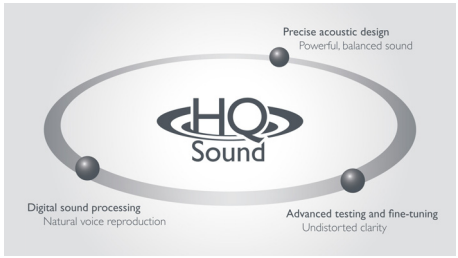
Eco-conscious model with ECO+

Philips phones are energy efficient and designed to be respectful to the environment. When ECO mode is activated, the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. With ECO+ mode activation, the radiation drops to zero.

Handset speakerphone

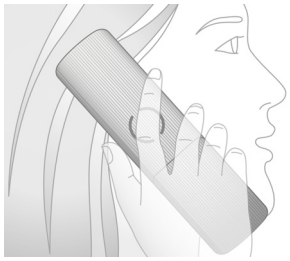
Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

HQ-Sound



Philips cordless phones with HQ-Sound build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything – high-quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

Non-slip grip



The rear of the handset is treated with a special texture for added comfort and better grip.

Silence mode

Value your privacy and quiet at home? Easily disable the ringtones for specific "no call" times to enjoy peace and silence.

Up to 16 hours talk time

Up to 16 hours of talk time on a single charge

Up to 25 min. recording

Up to 25 minutes of messages on your answering machine

Caller ID*

Sometimes it's good to know who's calling before you answer. And our Caller ID lets you keep track of who's on the other end of the line.

Keypad backlight

The soft amber backlight makes keys easy to read in low light conditions and at night.
