HIGHLIGHTS

Classic milk frother

The classic milk frother on this Gaggia Espresso machine, traditionally called a "Pannarello", turns milk into gorgeous milk froth within seconds for a Cappuccino, a Latte Macchiato and more. It also delivers hot water for tea.

Coffee-pod compatible

Our Gaggia manual machines come with a coffee filter for 1 or 2 cups of ground coffee, and a special filter for "ESE" (easy-serve Espresso) pods. These ESE pods are perfectly portioned and make it easier to operate a manual Espresso machine.

Descaling alarm

Your Gaggia machine will indicate when a descale cycle becomes necessary. Descaling will prolong the lifetime of your Espresso machine significantly and should only be completed with the original Gaggia descaler.

Double-walled crema filter

Double-walled pressurised crema filter

Preheating cycle

Preheating cycle for higher temperature in your cup

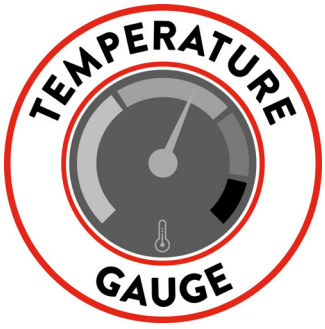
Pre-brewing system

Pre-brewing for even more enjoyment. Thanks to the Pre-brewing Technology, the coffee grounds are moistened before the actual brewing process – ensuring that the aroma unfolds even better.

Stainless steel

The cutting-edge design of your Saeco espresso machine is rounded off by the stainless steel finish. The stainless steel provides a high-quality look and will be a highlight on your kitchen counter tops. It also gives greater resistance for a long-lasting performance.

Boiler temperature gauge



The Gaggia boiler temperature gauge allows professional monitoring of the water temperature in the boiler so you always get the best result in the cup.
