

Philips
Cordless phone

• 1.6" display/ amber backlight

D1201WA/63

Color your conversation

A compact phone with all the essential functions at your finger tips. Ergonomically designed to give excellent sound reproduction, this plug & play device makes calling your loved ones truly enjoyable.

Benefits

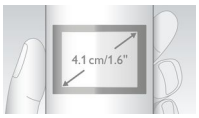
Nice and simple
• Easy to read 4.1 cm (1.6") display with backlight
• Caller ID – so you always know who is calling*
• Ultimate convenience through easy setup
• Textured back cover for non-slip grip
• Up to 10 hours talk time on a single charge

Crystal clear sound
• Automatic Volume Control offsets unwanted volume variation
• Optimized antenna layout for great reception in any room
• Parametric Equalizer delivers pure and clear sound
• Advanced sound testing & tuning for superb voice quality

Eco-conscious product
• Low radiation and power consumption

Features

4.1cm (1.6") display



Automatic Volume Control

Automatic Volume Control offsets variations in sound signal, which can be caused by distance, signal strength or the caller's phone - so what you hear always remains consistent. Reducing the audio amplification for strong signals,

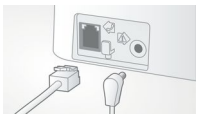
PHILIPS

and increasing it for weak ones, it means you can enjoy a smooth conversation without unwanted sound volume variation.

Caller ID*

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

Easy setup



Ultimate convenience through easy set up. Simplified installation - Plug & Play product

Non-slip grip

The rear of the handset is treated with a special texture for added comfort and better grip.

Optimized antenna layout

Our optimized antenna layout ensures strong and stable reception – even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

Parametric Equalizer

Our telephones use parametric equalization in the digital sound processing to fine-tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Up to 10 hours talk time

Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction.
