

Philips

Body analysis scale with Bluetooth® Smart

- Measures body weight
- Analyses body fat and BMI
- With Philips health app

DL8780

Connected weight tracking

With Philips HealthSuite health app

The Philips body analysis scale provides accurate weight measurements and shows your body fat percentage and BMI in the Philips HealthSuite health app so you can conveniently track your body composition over time.

Benefits

Delivers accurate weight measurements

- Provides accurate weight measurements
- Provided based on weight, BMI and body fat percentage.

Personalised tracking in the Philips health app

- Part of Philips connected health devices
- Connects to the Philips health app through Bluetooth Smart
- Up to eight different user profiles supported
- Track and better understand your body composition

Easy to use

- Designed for easy and fast weight measurement

Designed to fit your bathroom

- Designed with a large screen to clearly show results
- Gives results in kilograms, stones and pounds
- Designed with soft edges for safe use
- Equipped with four carpet feet

Features

Accurate

Four high-precision sensors deliver accurate weight measurements.

PHILIPS

Body composition analysis

Provides body composition analysis based on weight, BMI and body fat percentage. Four high-precision sensors deliver accurate weight measurements. Bio-Impedance Analysis (BIA) sends a small unnoticeable current through the body and establishes the body fat percentage. BMI is calculated based on the weight and height of the user. You can easily view your results in the Philips HealthSuite health app.

Connected scale

Connects with the free Philips HealthSuite health app to give you more data and insights into your health and wellbeing. Each reading is synced directly on the easy-to-use dashboard of the Philips health app.

Phone compatibility

Supports transfer of your data to the Philips HealthSuite health app via Bluetooth® Smart so you can monitor changes over time. Works with: - iPhone®: Version iOS8+ , iPhone® 4S and newer. - Android: Android 4.4 KitKat+.

Multiple user identification

Automatically recognises you when you step on the scale and sends your measurement data to the Philips HealthSuite health app on your smartphone.

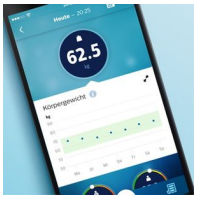
Large screen

Making it easy for you to read your measurement, with a large backlit LCD screen.

Kilograms, stones and pounds

Whether you measure in kilograms, stones or pounds, the Philips body analysis scale will give you the results you need in the unit you understand.

Personalised tracking



Determines your normal weight over time, along with your body fat percentage and BMI so you can track and spot changes quickly and easily in the Philips HealthSuite health app.

Soft edges

Soft edges provide an appealing look and a safe user experience.

Carpet feet

Allows measurements on soft surfaces like a carpet.

Easy to use

Quick and easy to use. Compact and streamlined, the scale has a simple sense-on technology that starts when you step on it and automatically syncs to your user profile in the Philips health app.

Specifications
