

Cordless phone with answering machine

- 30-min answering machine
- 4.6-cm display/white backlight
- Handset speakerphone

D4551B/22

# Smart Elegance

This exquisitely designed cordless phone boasts premium detailing alongside smart functions like an answering machine, a large reverse display, metal-plated keys and, of course, crystal clear sound for perfect connections every time.

## Benefits

### As convenient as it should be

- High-contrast, 4.6-cm (1.8") white-on-black graphical display
- Caller ID – so you always know who is calling*
- Keypad backlight for fast access even in dark rooms
- Privacy settings: call block, silence mode, call barring
- Two-field entries for assigning 2 numbers to one contact
- Up to 16 hours of talk time on a single charge
- Family Notes records audio messages for loved ones
- Up to 30 minutes of messages on your answering machine

### Exceptional sound

- Freestanding handset with a speaker for easy hands-free calls
- HQ-Sound: high quality acoustic engineering for superb sound
- MySound profiles to match your sound preference

### Eco-conscious product

- Low radiation and power consumption

PHILIPS

## Features

### 4.6-cm (1.8") graphical display

### Caller ID*

Sometimes it's good to know who's calling before you answer. And our Caller ID lets you keep track of who's on the other end of the line.

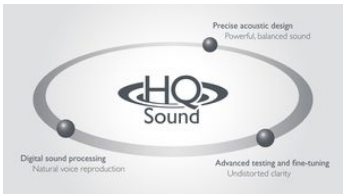
### Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

### Handset speakerphone

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

### HQ-Sound



Philips cordless phones with HQ-Sound build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything – high-quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

### Keypad backlight

The soft amber backlight makes keys easy to read in low light conditions and at night.

### Multiple privacy settings

Blacklist restricts calls from specific numbers or numbers starting with certain digits, keeping unwanted calls away. You can block 4 sets of numbers. Each set of numbers can consist of 1 to 24 digits. When there is an incoming call from a number starting with one of these numbers or from one of 4 exact Caller numbers, the phone will not ring. With silence mode you can disable the ringtones at specific times to enjoy peace and silence. Thanks to Call barring, you can avoid expensive phone bill surprises by blocking calls to specific numbers starting with certain digits.

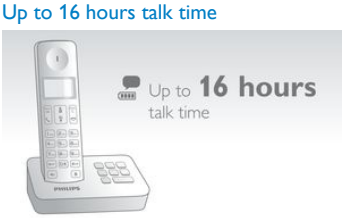
### MySound profiles

Sound perception is subjective, and everyone has their own listening preference. MySound brings personality back to every conversation by allowing you to choose the audio profile that best matches your sound preferences: Clear—to make voices sound crisper and clearer; Soft—for friendly, softer tones; Warm—to make voices sound welcoming and warm.

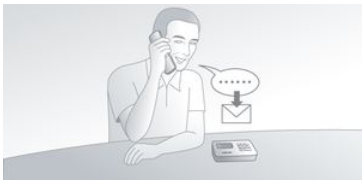
### Two-field phonebook entries

These days most people have multiple contact numbers. Our contact list makes it easier for you to manage your phone contacts. Simply save two phone numbers from a choice of three different field names: home, work and mobile.

### Up to 16 hours talk time



### Family Notes recording



Need to get an important message to your loved ones? Physical notes won't get your true meaning or emotion across like your own voice can! Simply use the Family Notes function on the handset to record your audio message. Your loved ones will be notified and can retrieve the message just like on an answering machine. No more miscommunication!

### Up to 30 min. recording

With 30 minutes' recording time on your answering machine, you'll never miss an important message.
