Air humidifier

Safe & clean

NanoCloud technology
Automatic
Digital sensor

HU4903/02

Healthy air, always

with NanoCloud technology and automatic mode

Automatic control and NanoCloud technology in the Philips Air humidifier fight dry air all year long with maximum performance. It has 99% less bacteria spreading compared with ultrasonic technology, and no white dust and wetting floors.

Healthy Air

- Hygienically safer, no white dust* and no wet desktop
- Digital humidity sensor constantly monitors the air
- Automatic humidity mode for your peace of mind
- Humidification settings allow for precise humidity control
- Evenly distributes humidified air throughout the room

Always

- Healthy air protect alert warns you when to refill the tank
- Auto shut down when humidifier runs out of water
- 4l water tank delivers at least 11 hours of humidified air

Simplicity

- Choose between silent, standard or powerful humidification
- 1/4/8 hours easy-to-set timer
- Minimalist design gives you best-in-class cleanability
- Easy-fill tank

PHILIPS

Air humidifier
Safe & clean NanoCloud technology, Automatic, Digital sensor

HU4903/02

Highlights

NanoCloud technology

This Philips air humidifier offers a three-stage advanced evaporation system with NanoCloud technology. Stage 1: the absorbent filter on the humidifier catches big particles such as human/pet hair and dust when drawing in the dry air. Stage 2: the advanced evaporation system with NanoCloud technology humidifies the air by adding water molecules to the air and does not carry bacteria or scale. Stage 3: healthy air gets blown out of the humidifier at a constant speed, delivering comfortable, healthy humid air without formation of water mist in your home.

Digital humidity sensor

The digital humidity sensor continually compares the actual air humidity level with your pre-selected humidity level. An indicator lights up red if the actual humidity is below the desired level. It lights up blue when the actual air humidity level is at your desired level. It is now simple to check if the air in your home is at the humidity level that you chose.

Automatic humidity mode

The automatic mode uses the digital sensor to constantly monitor the air humidity and will turn on and off your humidifier whenever needed, ensuring the humidity level is constantly at the right level

Precise humidity settings

The Philips Air humidifier allows you to choose between 40, 50 and 60 percent humidity in the air for maximum comfort.

Comfortable humidification

Evenly distributes humidified air throughout the room. Breathe and sleep better at home with healthy humidified air

Healthy air protect alert

Red light alert warns you when to refill the tank

Healthy air protect lock

When the water tank is empty and needs to be refilled, the healthy air protect lock shuts off the humidifier and a red indicator lights up telling you that the humidifier has stopped.

4-liter water tank

4-liter water tank delivers at least 11 hours of comfortable humidified air to your home. You can fill the tank with tap water, filtered or purified water – whichever you want. The Philips air humidifier offers maximum efficiency and convenience for you

Triple humidification speed

Choose between silent, standard or powerful humidification to allow maxium flexibility

1/4/8 hours easy-to-set timer

Appliance operates for a set number of hours and automatically switches off when set time has elapsed.

Best-in-class cleanability

Cleaning humidifiers inside and out – especially the water tank – has never been easier

Easy-to-fill tank

Fill with a jar or bring the water tank to the tap. The 'max' indicator clearly shows how far to fill the tank. When the tank is empty, the humidifier automatically shuts off and the display indicates a re-fill is needed.

Specifications

Design specifications

- designed in: Korea
- Product dimensions (W x D x H): 340 x 316 x 415 mm
- Color(s): Dark Silver Metalic

Technical specifications

- Recommended room size: 50 m²
- Humidification capacity: 255 ml/h
- Operation time: 11 hour(s)
- Water tank capacity: 4 L
- Air quality sensor(s): Humidity sensor
- Noise level: 26-38 dB
- Voltage: 220-240 V

Replacement

- Humidification filter: Replace HU4101 once per year
- Antibacterial agent: Replace HU4111 once per year

Issue date 2016-12-27
