Real Italian Espresso

Enjoy a professional coffee bar experience

- Pressurised filter holder for perfect crema
- Solenoid valve for easier coffee disposal
- Coffee-pod compatible
- Professional filter holder for consistent coffee temperature
- 15 bar pressure for full Espresso taste
- Classic milk frother for a tasty Cappuccino
- Rotating classic milk frother for hassle-free frothing

Highlights

Pressurised filter holder

The pressurised filter holder on your Gaggia machine will create an Espresso with the perfect Crema.

Solenoid valve

When you switch off your Gaggia Espresso machine, the solenoid valve releases the water pressure completely, allowing the used coffee puck to dry. This ensures easier cleaning after you prepare an Espresso.

Coffee-pod compatible

Our Gaggia manual machines come with a coffee filter for 1 or 2 cups of ground coffee and a special filter for "ESE" (easy-serve Espresso) pods. These ESE pods are perfectly portioned and make it easier to operate a manual Espresso machine.

Professional filter holder

The heavy filter holder on your machine is made from chromed brass, and is also used on all professional Gaggia Espresso machines. Only the professional filter holder will give you a consistent coffee temperature and the real Barista experience.

15 Bar

The 15-bar pressure of your Gaggia coffee machine will make sure you always get the authentic Espresso taste.

Classic milk frother

The classic milk frother on this Gaggia Espresso machine, traditionally called a "Pannarello", turns milk into gorgeous milk froth within seconds for a Cappuccino, a Latte Macchiato and more. It also delivers hot water for tea.

Rotating classic milk frother

The classic milk frother on this Gaggia Espresso machine, traditionally called a "Pannarello", turns milk into gorgeous milk froth within seconds for a Cappuccino, a Latte Macchiato and more. It also delivers hot water for tea and can be easily rotated for hassle-free frothing.

Specifications

Weight and dimensions

Product dimensions: 23.0 x 24.0 x 38.0 cm
Water tank capacity: 2.1 l

Technical data

Pump Pressure: 15 bar
Power: 1300 W
Boiler: Anodised
Voltage: 230 V
Frequency: 50 Hz Hz

Service

2-year worldwide guarantee: Yes

Features

Suitable for pods: Yes
