Highlights

1600W for gentle drying

This 1600W hairdryer creates the optimum level of airflow and gentle drying power, for beautiful results every day.

Curl diffuser

The curl diffuser spreads the flow of air across the hair, boosting volume and enhancing curls while drying. For best results, hold the diffuser close to the crown and root area. The diffuser's fine textured pins will add volume, maximize thickness, bounce and help shape curls.

Foldable Handle

This hairdryer has foldable handle, making it easy to pack, store and take with you anywhere you go.

Cool shot to set style

A must-have professional function for hair dryer. Air cools down to environment temperature when keep pressing cool shot button, which helps to fix the style more quickly. Temperature goes up when release the button.

Magic touch sensor on handle

airflow will automatically on when hand touch on the handle, airflow automaticaly off when hand off the handle, release your hands for better styling

Smart control switch

Smart Control switch is a user friendly button that operates user interface for easy shift among 4 pre-programmed settings of drying including Fast Drying, Active Drying, Scalp Care and Easy Styling. They can fulfill all your drying and styling needs at home. Among them, Active Drying and Scalp Care adopt ThermoShield technology for worry free drying.

Thermo thield technology

ThermoShield is a smart drying technology. The sensor diagnoses continously heat of air and automatically adjusts temperature, which helps to reduce hot spot, thus protects hair and scalp from overheating damage and make the hair strong and more shine*. * up to 19% more shine with thermo shield sensor("Active drying" setting) compared to "Fast drying" setting

4X ionic care *

Instantly release 4 times ions for shiny, frizz free hair. Negative ions eliminate statics, condition hair and scalp, and smooth down hair cuticles to deliver smooth and shiny look. Dual ionic outlet, one being in the center of dryer and the other close to opening, ensures even ion distribution with air flow and great conditioning effect.

Nozzle

Concentrator focuses the airflow for a polished, shiny look
