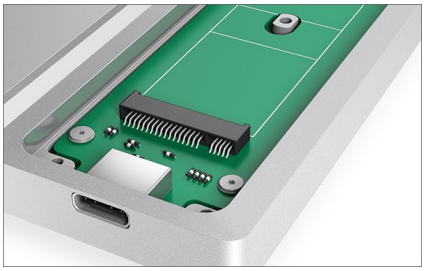
ICY BOX **IB-188M2**
External USB 3.1 enclosure for M.2 SATA SSD

Small and good looking

The IB-188M2 is a enclosure for a M.2 SSD. It is entirely built of aluminum with a sand-blasted surface. This looks good and gives stability. With a size of only 11x5 cm, it fits in any pocket.

The new standard

The connection between host PC and external enclosure is realized by a USB 3.1 Type-C™ port. Thanks to the USB 3.1 protocol a high data transfer rate of up to 10 Gbit/s can be achieved.



Small storage is mobile storage

SSDs in the M.2 format are suitable for more than just installation in PCs and laptops because of their small size and high speed, they can be installed in much smaller devices as well. With the IB-188M2 you can take your SSD anywhere safely and use it via USB 3.1 Type-C™.
