PHILIPS

Features

Warm white light

Light can have different colour temperatures, indicated in units called Kelvin (K). Lamps with a low Kelvin value produce a warm, more cosy light, while those with a higher Kelvin value produce a cool, more energising light. This Philips lamp offers warm white light for a cosy atmosphere.

Energy saving

This Philips energy-saving lamp conserves energy compared with traditional light sources, helping you to save money on your electricity bills and do your bit for the environment.

On/off switch on cable

With the switch discreetly integrated into the cable, you can easily switch the lamp on and off.

Philips bulb always included

High-quality Philips EcoClassic energy-efficient light bulbs are included in the box for achieving the best light effect.
