High Visibility Large Print Keyboard White Letters

Part code: K-HV-TW

Description

The High Visibility Large Print Keyboard is suitable for users who require support for vision impairment. This Multimedia keyboard provides large characters that are equally high in contrast and visibility. The keyboard contains full upper case lettering to enhance the users' visibility and computing experience. This is a high quality keyboard ideal for multi-use areas with frequent users, such as libraries and computer centres. The etched letters provide sustained durability for long-term use. 18 Multimedia buttons can be used to simplify common Windows tasks.
