APPlicator for iPad

Part code: A-NS-APP

Bluetooth Receiver allows connection of switches to your iPad and other devices.

Description

The APPlicator connects to your iPad, iPad mini, iPod, and iPhone devices with iOS7 via Bluetooth and gives comprehensive scanning switch access to Apps, Music, iBooks, internet, and photography. To get up and running all you need to do is pair the device with your iDevice and start working with your wired switches.

New Features with iOS 7

- Scan Using The New Switch Control Feature
- Added Switch Function - 'Home'
