SimplyWorks Receive

Part code: A-NS-SWR (USB), A-NS-SWRM (micro USB)

USB wireless receiver supports up to six SimplyWorks transmitter devices

Description

The SimplyWorks® Receive is a USB wireless receiver and interface which forms the hub of the SimplyWorks® system when used for computer access and will support up to six SimplyWorks® transmitters of any kind.
The receiver can be used with any device with a USB port including PCs, Windows Tablets, Android devices and Samsung Galaxy (with adapter). The receiver supports SimplyWorks® Trackball, Joystick, Switch 125, SEND, and keyboard functions all via a single USB connection to the host computer and without dedicated driver software.

SimplyWorks® Receive also includes CAPs and DRAG lock LEDs for easy identification when multiple users are using mouse and keyboard functions.
SimplyWorks® allows you the freedom to create wireless, single or multi-user learning environments, reducing set up time and allowing you to concentrate on the learning tasks themselves.

Features

- State of the art multi-channel wireless receiver with a range in excess of 10m, making it ideal for classroom environments.
- Supports up to six transmitters simultaneously.
- No restriction on the mix of transmitters.
- Caps Lock and Drag Lock LEDs.
- USB Connectivity.

- No additional drivers required.
- PC and Mac compatibility.
- Compact design.

Dimensions and weight

- Product- L – 9cm, W-6.5cm, H- 2cm, 0.07Kg
- In Box – L- 18cm, W- 13cm, H- 4cm, 0.10Kg
- Has a 2 metre cable.

Compatible Devices

Part Code	Description
A-NS-S125B	SimplyWorks Wireless Blue Switch for iPad 125mm. Use with SimplyWorks Receive to enable wireless access to scanning functions
A-NS-S125G	SimplyWorks Wireless Green Switch for iPad 125mm. Use with SimplyWorks Receive to enable wireless access to scanning functions
A-NS-S125R	SimplyWorks Wireless Red Switch for iPad 125mm. Use with SimplyWorks Receive to enable wireless access to scanning functions
A-NS-S125Y	SimplyWorks Wireless Yellow Switch for iPad 125mm. Use with SimplyWorks Receive to enable wireless access to scanning functions
A-NS-S75B	SimplyWorks Wireless Blue Switch for iPad 75mm. Use with SimplyWorks Receive to enable wireless access to scanning functions
A-NS-S75G	SimplyWorks Wireless Green Switch for iPad 75mm. Use with SimplyWorks Receive to enable wireless access to scanning functions
A-NS-S75R	SimplyWorks Wireless Red Switch for iPad 75mm. Use with SimplyWorks Receive to enable wireless access to scanning functions
A-NS-S75Y	SimplyWorks Wireless Yellow Switch for iPad 75mm. Use with SimplyWorks Receive to enable wireless access to scanning functions
A-NS-SWR	SimplyWorks Receive USB. Provides wireless switch access to a range of Android and Windows devices including PCs and Tablets. Use with the range of SimplyWorks wireless joystick, trackball, or switches
A-NS-SWRM	SimplyWorks Receive Micro USB. Provides wireless switch access to a range of Android and Windows devices including PCs and Tablets. Use with the range of SimplyWorks wireless joystick, trackball, or switches
M-NS-JT	SimplyWorks Wireless Joystick. Use with SimplyWorks Receive to enable wireless mouse functions on your PC computer. The Joystick is specifically designed for cursor movement to respond to the lightest touch (0.5 Newtons), making it one of the only wireless joysticks designed for accurate, cursor navigation and precise targeting of objects on the computer screen, for those with motor skill difficulties. Also features colour coded Left/Right and Drag Lock buttons mounted sub-flush to prevent accidental operation.

M-NS-TB	SimplyWorks Wireless Trackball. Use with SimplyWorks Receive to enable wireless mouse functions on your PC computer. Lightweight and robustly constructed with no mechanical wearing parts, the Trackball can be used as either a desktop or hand-held unit. Also features colour coded Left/Right and Drag Lock buttons mounted sub-flush to prevent accidental operation.
M-TJ	Optimax Wireless RF Joystick. Use with SimplyWorks Receive to enable wireless mouse functions on your PC computer. Includes two sockets for connection of external switches.
M-TX	Optimax Wireless RF Trackball. Use with SimplyWorks Receive to enable wireless mouse functions on your PC computer. Low profile and large trackball with space to provide hand rest, the buttons are recessed to avoid accidental operation. Includes two sockets for connection of external switches.
