Highlights

For kids

This Philips and Marvel light for your child's bedroom creates an environment which encourages children to indulge in what they enjoy most – fun and creativity! A place where your child can study, play and sleep accompanied by their favourite Marvel character. This light is designed to be safe for your child.

High quality LED light

The LED technology, integrated into this light, is a uniquely developed solution by Philips. While instantly turned on, it enables optimal light output and brings out vivid colours in your kid's room.

Warm white light

Light can have different colour temperatures, indicated in units called Kelvin (K). Lights with a low Kelvin value produce a warm, more cosy light, while those with a higher Kelvin value produce a cool, more energising light. This light offers warm white light for a cosy atmosphere.

Battery-operated - 2 x AAA

This light works on 2 AAA batteries. All batteries of this size will work. Do not mix different types of batteries; always use the same type. The batteries are not included in the box.

Day and night motion sensor

A motion sensor is included to reassure your child at night. When the sensor detects movement, the light switches on automatically.

Reassures your child at night

This Philips and Marvel light for your child's bedroom is the perfect night light to make your child feel safe. The integrated day and night motion sensor makes it easy for your child to switch on the light with a simple movement or just by walking by. Positioned beside your child's bed, it's the ideal orientation light.

Specifications
