- Iconic stainless steel front, shaped to precision
- Tactile backlit display and seamless navigation

*Based on 8 filters replacement as indicated by the machine. Actual number of cups depends on selected coffee varieties, rinsing and cleaning patterns.

Highlights

AquaClean filter

Saeco's new and patented innovation, AquaClean water filter, ensures you make the most out of your full automatic coffee machine. By changing the filter at machine request, you will not need to descale your machine for up to 5000 cups*, while getting the benefit of clear and purified water. As an added benefit, the descaling notification alarm is automatically deactivated once AquaClean is installed in your favourite Saeco coffee machine.

Quick Heat Boiler

When time is of the essence, you can brew perfect espresso and cappuccino without the wait, thanks to the Quick Heat Boiler. The secret is in its light aluminum and stainless steel body, which can reach hot temperatures, fast.

Customize your coffee

Choose your ideal strength from the 5 different settings, select the length and the temperature. You can easily save your desired coffee length with the Memo Function for each drink. Then every cup in the future will be customised exactly to your taste. You'll never have to remind it again, unlike the local barista.

100% Ceramic grinders

Our grinders are made of high-tech ceramic: exceptionally hard and precise. Fresh beans are gently ground, without risk of overheating: extracting all the best flavors and aroma, delivering a superior coffee taste for at least 20,000 cups.

Automatic Milk Frother

The Automatic Milk Frother will deliver your coffee’s crowning glory at the touch of a button. Within seconds it will be topped with a silky, milk layer of the finest consistency - the ultimate lure for all cappuccino lovers.

10-settings adjustable grinder

When it comes to the fineness of the grind, this machine never fails to satisfy. Different coffee blends require different levels of granularity for the full flavour to unfold. So the grind granularity of this machine has ten adjustable settings – from the finest grind for a full-bodied espresso, to the coarsest for a lighter coffee.

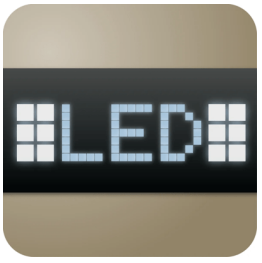
Coffee at one touch

From Espresso to Cappuccino, there is an assortment of options waiting to satisfy your coffee cravings. Whether it’s first thing in the morning or an after dinner treat, there’s a taste for any time of the day, right at your fingertips.

Stainless steel material

The use of stainless steel on the front and top crafted with Italian design ensure that this Full Autom machine will stand the test of time in a classic or modern kitchen. An elegant vision of pure design, your machine will look as refined as the coffee it makes.

Intuitive 12 button display



The advanced user interface features 12 LED backlit buttons which provide one-touch beverage selections and easy navigation. A display with a combination of icons and text will guide the user through all customisation options and important maintenance activities.

Specifications

General specifications

Cups at the same time: 2
Temperature settings: 3
Coffee strength settings: 5
Grinder settings: 10
Type of display: LCD
