HDMI Active Optical Cable (AOC) - Certified Ultra High Speed HDMI AOC featuring future-proof 8K60 for high-end 2.1 AV and gaming applications

The superior Ultra High Speed HDMI standard of this Manhattan HDMI Cable makes you ready for the next generation of graphic challenges in audio/video, gaming, digital signage and other high-end applications.

Active optical technology for no interference and extra-long distances

AOC technology offers several advantages over standard HDMI cables. Its smaller cable diameter ensures greater flexibility and maneuverability during installation into tight spaces. Plus, its construction from fiber strands eliminates the risk of electromagnetic/radio frequency interference to give the best performance, stability and reliability. The AOC is an excellent choice for high-interference environments such as data centers, surgical theaters, DJ events or manufacturing facilities where high resolution and consistent display are critical. It is plug and play, and it draws its power from the HDMI source device, so no external power source is required.

Brilliant colors and contrast with Dynamic HDR and Dolby

Vision™

This cable is officially licensed and certified to deliver images in brilliant 8K (7680 x 4320) at rapid 60 Hz or 4K UHD at blazing fast 120 Hz with Dynamic HDR and Dolby Vision™ for perfect contrast and colors.

Crystal-clear sound with Dolby Atmos®

Both Dolby Atmos and eARC support work together to deliver audio in unparalleled clarity and depth through as many as 32 channels.

Gold-plated contacts and Ethernet channel

Gold-plated contacts provide maximum signal integrity as well as crisp, clear signal transmissions. Thanks to the integrated HDMI Ethernet Channel (HEC), the cable includes Internet connectivity for home entertainment devices. Use it with every HDMI device - TVs, projectors, monitors, notebooks, PCs, AV receivers, streaming boxes, game consoles, PlayStation® (PS4/PS5), Xbox® (One/One X/Series S/Series X), Blu-ray players and more.
