Designed for professionals

- Exchangeable memory card for unlimited recording
- High recording quality in DSS format
- Voice-activation function for hands-free recording

PHILIPS

Digital dictation recorder
Slide-switch operation

LFH9380/00

Highlights

Slide-switch operation

Professional recording control with slide-switch operation.

Professional editing functions

Professional editing functions like overwrite/ insert/partial delete/lock available for an optimal workflow.

Intuitive control

Smart buttons let you scroll through menu options and quickly make selections. This makes navigating through the menu to assign work types and other commands fast and intuitive.

Exchangeable memory card

Virtually unlimited recording capacity thanks to an exchangeable memory card.

High recording quality in DSS

The DSS format was developed for the use in digital voice recorders, achieving a high compression ratio with little loss of quality.The DSS format also allows you to store additional information in the file header, which facilitates the organisation and the transcription of dictation files.

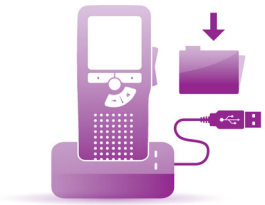
Track work through job status

The professional SpeechExec software allows you to track your job status information. It grants you a clear view over your work in progress.

Ten individual author IDs

The organisation of your dictations now gets even easier with ten individual author IDs.

Automatic download via USB



When plugged in, the Pocket Memo dictation recorder automatically downloads your audio files directly onto the computer.

Efficient handling

The SpeechExec software enables you to efficiently handle your sound files, which makes retrieving your jobs fast, easy and convenient.

Priority setting

With the included priority setting option, urgent recordings get processed first.

Voice-activation function

Voice-activated recording is a convenience feature for hands-free recording. When enabled, recording will start automatically when you start speaking. Recording stops automatically after you stop speaking and restarts automatically when you start speaking again.
