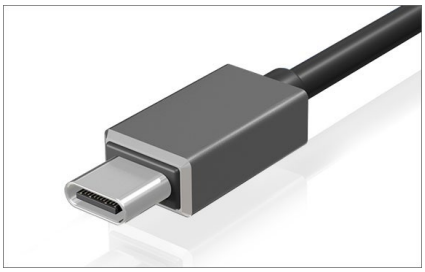
ICY BOX **IB-HUB1412-CR**
3 Port USB Type-C™ hub & card reader

The most important on board

The IB-HUB1412-CR has everything you need on board - one MicroSD and SD card slot and three USB 3.0 ports. This makes it the quiet companion that should always be with you in any office environment. And the user also remains silent, because the usual search for the correct direction of the USB port is a thing of the past thanks to the Type-C™ port to the computer.



Three is the perfect number

We have seen this before - there are two USB ports on the computer and yet there is always one too few. This is over now, because the IB-HUB1412-CR comes with three additional ports - this prevents unexpected situations!

More juice needed?

With the optional connection of a 5 V power adapter, the IB-HUB1412-CR can be provided with more power for the use of several or individual devices with increased power consumption. This also allows the use of external hard disks together with other devices at the same time.

Logistical data

Packing unit:	30 pcs./carton	**Dimension/carton:**	435x320x125 mm
