Highlights

4 doorbell melodies to choose
You have four doorbell melodies to choose from to find the one that suits you best. Choose a different doorbell melody for each Philips wireless chime transmitter. Each of your entrances will be easily identifiable.

Powerful sound
Be aware when a visitor rings your doorbell with the powerful 85dB sound of your WelcomeBell 300 Basic wireless chime.

Visual alerts
Combine the sound alert with the monochrome LED light flash. This is triggered if the call button is pressed. You won't miss a single visitor even if your wireless doorbell is in silent mode.

Settings and mode selection
Adapt your WelcomeBell 300 Basic wireless chime to your needs by adjusting the doorbell volume. There are also three doorbell modes available with a choice of: Ring / flash (silent) / ring + flash. Ideal if you don't want to wake a child for example.

Upgradeable system
Link up to four different chimes and four different transmitters (door/window opening detector, call button and motion detector). This upgradeable platform enables you to make up your Philips doorbell as you wish.

For outdoor use
Use your Philips wireless chime even when it is raining with its light-up weather-resistant (IP65) call button.

Low battery detection
If the Welcome Bell 300 Basic chime or transmitter battery is low, you are alerted with a simple light flash and a beep. No more surprises from a wireless doorbell that no longer works.

Modern wireless doorbell
Attractive, modern and compact, this WelcomeBell 300 Basic wireless chime will fit in perfectly with your interior.

Wireless
This mobile doorbell is very easy to install and doesn't need any wiring. The very long 300m open range enables you to install your transmitter and your receiver where you wish. You can either stand it up or attach it to the wall.
