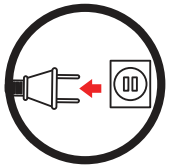
Do not clean the device with chemical substances



Disconnect the device from the power supply, when not in use

Do not look directly into the light

HIGHLIGHTS

- With this Salora Portable mini projector, you can watch movies, sports, video's, pictures and much more as if you were watching a 80-inch screen with dynamic image quality.
- Plug your DVD or Blu-ray player into one of the two available HDMI digital inputs or send a video file from your computer via the VGA port. In addition, you can use the AV port to connect another video player.
- You can plug in a USB memory device or SD card for the projection of your media files.
- The portable mini projector delivers clear images under low light conditions. The audio can be played through the built-in speaker, but if you need more audio output, you can connect an external speaker or audio system using the 3.5 mm connector (included). It is one of the most lightweight and small size devices on the market. You can operate this projector by using the remote control (included) choosing the functions and menus.

Note:

We do not recommend using the projector for Word or spreadsheet presentations because this projector is not meant to be used for professional educational purposes. It is recommended to be used mainly for playback of video and image files.
