Highlights

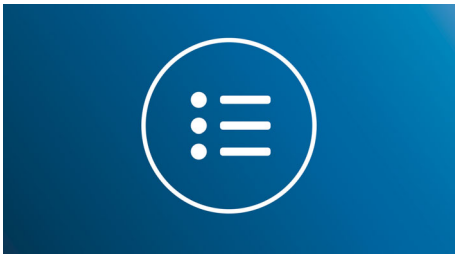
Say goodbye to plaque

Densely-packed, high-quality bristles remove up to 7x more plaque than a manual toothbrush.

Look after those gums

With optimal cleaning from your FlexCare, gums will become healthier in 2 weeks. Removing up to 7x more plaque along the gum line than a manual toothbrush, you'll get your healthiest smile.

3 modes to clean your way



With FlexCare, you can change how you brush to meet your oral health goals. Choose from 3 modes including Massage - to stimulate gums for even better gum health, Clean - for outstanding daily cleaning and White - to gently yet effectively remove surface stains.

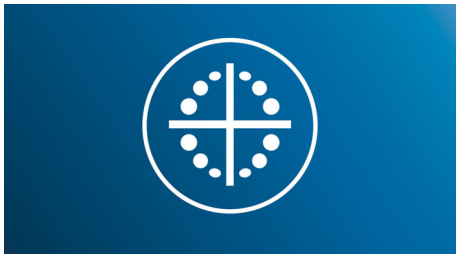
Ease into your new routine

Starting something new can take some getting used to. Our easy-start program gives you the option of a gradual, gentle increase in brushing power with the first 14 uses with your new toothbrush.

Brush with confidence

Whatever your specific needs, you can be sure of a safe brushing experience with the Flexcare. Our sonic technology is suitable for use with braces, fillings, crowns and veneers, and can even be used in the daily treatment of gum disease.

QuadPacer and Smartimer



It takes just 2 minutes to thoroughly brush your teeth. Our QuadPacer lets you know when you've spent the optimal amount of time on each section of your mouth while our Smartimer signals when your total time is up. Together they help you reach your recommended brushing time, every time.

Reach those tricky spots

The unique shape of your FlexCare toothbrush handle combined with our brush heads means that even tricky spots like back teeth get a thorough clean.

Philips Sonicare technology

Powerful sonic vibrations whip up your toothpaste into plaque fighting bubbles, and drive them deep between your teeth and along your gum line. At the same time your teeth will experience 31,000 gentle but effective brush strokes. You'll get a month's worth of manual brushing in just 2 minutes.
