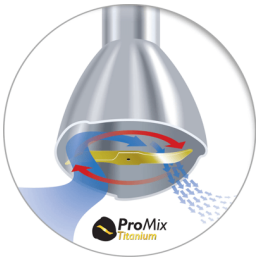
**Compared to Philips Hand blender with bell-shaped blade chamber in internal test on tomato and uncooked vegetables

Highlights

ProMix blending technology



Developed together with the prestigious Stuttgart University, Philips ProMix is a unique, advanced technology that uses a specific triangular shape to create optimal food flow and maximum performance for faster and more consistent blending.

Powerful 800 Watt motor

Powerful and reliable 800-W motor that can drive a large variety of accessories to allow processing of almost any ingredient and deliver great results during food preparation.

SpeedTouch with Turbo boost

Intuitive variable speed setting and turbo boost in one button that gives you more power as you squeeze. Start slowly to prevent splashing and smoothly speed up until you reach the required speed for each application and every type of ingredient. Prepare all your favourite recipes at the touch of a button.

Titanium coated blade

Titanium layer coating (TiN) that makes the knife six times harder than a standard stainless steel knife and ensures great performance over time. Combined with the optimised knife shape and unique ProMix triangular shape of the bar for the best blending results. It is food-safe.

Anti-splash blade guard

The special wave shape in the bottom part of the hand blender blending bar guarantees no splashes or mess while you blend.

XL Chopper accessory

With the XL chopper accessory (1000 ml) for a Philips hand blender you can chop large quantities of meat, herbs, nuts, cheese, chocolate and onions in seconds.

Whisk accessory

Single whisk accessory for Philips hand blender for whipping cream, mayonnaise, pancake batter and more. Makes your hand blender multifunctional and versatile.

2-year guarantee

With 2 years worldwide warranty.

Ergonomic rubber grip

Ergonomic soft-touch handgrip, designed to give a secure and safe grip that allows for easy holding and manoeuvring of the hand blender during use.

Specifications

Sustainability

Packaging: > 90% recycled materials
