AIM
E-SPORTS MOUSE

ALMOST INFINITE CUSTOMIZATION

Get into professional gaming and eSports thanks to this exclusive tool, created to allow you to compete at the highest level.

AIM adapts to the needs of any game and player: reduce or extend the lateral button panel, distribute the buttons as you prefer, adjust and optimize your mouse to obtain a totally personalized, unique and exclusive product. More than 200 possible combinations!

Adapt the weight to your needs with the four 5g weights that the AIM mouse includes, adding up to 20g of extra weight to obtain maximum stability, guaranteeing a fluid and precise movement.

With its fully configurable DNA RGB lighting, this mouse is the perfect companion for your most intense games. Bring color to your games to light up all your victories!

THE BEST BENEFITS

Equipped with an Avago optical sensor of 10000 DPI, the AIM mouse has been created for e-sports, offering maximum sensitivity and speed to take advantage of your rivals.

Compete at the elite level and configure your mouse thanks to its advanced control software for Windows. Program your 17 OMRON buttons, select different lighting effects and change the DPI of your AIM mouse to obtain an exclusive product designed for professional competition and eSports.

This mouse has an anti-slip teflon base designed to offer the best grip and optimal glide. In addition, so that you never lower the rhythm of your games, designed to guarantee maximum durability in an intensive professional use of e-Sports, this mouse includes an exchange kit for the teflon bases for your AIM mouse to always perform as the first day.

Take care of every last detail and worry only about winning thanks to its reinforced cable and its gold connector.
