ICY BOX **IB-1812-C31**
External Type-C™ enclosure for M.2 SATA SSD

Fast mover

The connection between the host PC and the external enclosure is realized by a USB 3.1 Type-C™ port. Thanks to the USB 3.1 protocol, a high data transfer rate of up to 10 Gbit/s can be achieved.

Small storage is mobile storage

SSDs in the M.2 format are suitable for more than just installation in PCs and notebooks. Because of their small size and high speed, they can be installed in much smaller devices as well. With the IB-1812-C31 you can take your SSD anywhere safely and use it via USB 3.1 Type-C™.

Small and good looking

The IB-1812-C31 is an enclosure for an M.2 SSD. It is entirely built of aluminium with a matt black surface. This looks good, gives stability and keeps a cool head while long term use. With a size of only 10x4 cm, it fits in any pocket.
