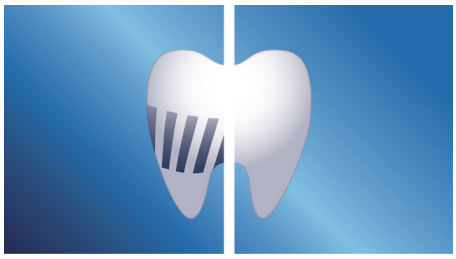
Highlights

Reaches deep between teeth



FlexCare Platinum reaches deep between teeth to provide superior plaque removal. It is clinically proven to remove 7x more plaque between teeth than a manual toothbrush.

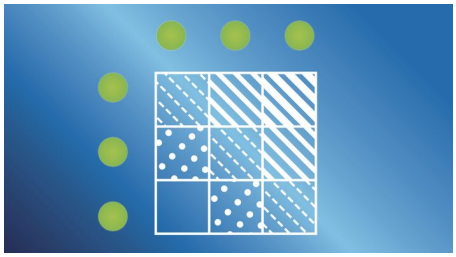
Reach deeper and go further

Philips Sonicare InterCare toothbrush head features extra-long, high-density bristles to target hidden plaque caught deep between teeth and other hard-to-clean areas.

Sonic technology

Unlike a traditional electric or power toothbrush, Philips Sonicare features a patented sonic technology. Sonicare's unique dynamic cleaning action drives fluid between teeth, gently and effectively removing plaque interdentally and along the gum line.

Customized brushing experience

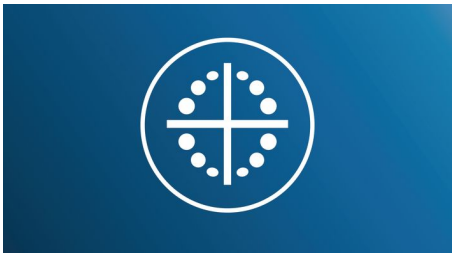


With three intensity settings and three cleaning modes, FlexCare Platinum offers optimal comfort as you get a truly deep clean.
If you need to pay extra attention to trouble spots, the three-minute Deep Clean mode delivers exceptional results. Use Clean mode for a superb everyday clean, or White mode for stain removal. Set the intensity to Low, Medium or High according to your personal preference.

Intuitive pressure sensor

You might not notice if you're brushing too hard, but your FlexCare Platinum toothbrush will. If you apply too much pressure, the intuitive pressure sensor will make the toothbrush handle gently vibrate so you know exactly when to adopt a softer touch. In studies, 7 out of 10 aggressive brushers successfully reduced their brushing pressure thanks to the pressure sensor.

Quadpacer and SmarTimer



FlexCare Platinum offers two timers to help encourage thorough brushing. The Quadpacer interval timer indicates when it's time to move to another quadrant of the mouth, while the SmarTimer helps you reach the dentist recommended brushing time of two minutes.

Deep Clean mode

Our all-new Deep Clean mode delivers an exceptional clean in hard-to-reach places. The unique motion of the brush head in this mode plus an extended three-minute brushing time makes it the ideal choice when you want to pay extra attention to trouble spots.

UV Sanitizer

Keep your brush head really clean with Philips UV sanitizing technology. The UV sanitizer that comes with your FlexCare Platinum sonic toothbrush is specifically designed to help kill germs on brush heads. The sanitizer distributes sanitizing light around the entire top of the brush head, helping to kill up to 99% of bacteria.
