Keep it simple

Designed for complete simplicity, this phone gives you all the benefits of long-lasting ergonomic comfort, and great sound reproduction. A true plug & play device with an intuitive menu, it is simplicity itself.

Benefits

Nice and simple

- Easy to read 4.1 cm (1.6") display with amber backlight
- Ultimate convenience through easy setup
- Caller ID – so you always know who is calling
- Up to 16 hours of talk time
- Menu in multiple local languages
- Programmable hot keys for quick dial
- Textured back cover for non-slip grip

Crystal clear sound

- Parametric Equalizer delivers pure and clear sound
- Automatic Volume Control offsets unwanted volume variation
- Optimized antenna layout for great reception in any room
- Advanced sound testing & tuning for superb voice quality

Eco-conscious product

- Low radiation and power consumption

PHILIPS

Features

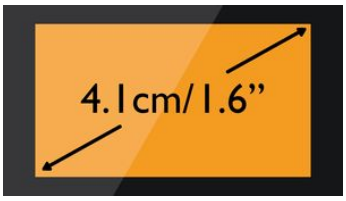
Parametric Equalizer

Our telephones use parametric equalization in the digital sound processing to fine-tune the sound response back to the intended linear frequency response curve, delivering sound that is pure and clear, for each conversation.

Automatic Volume Control

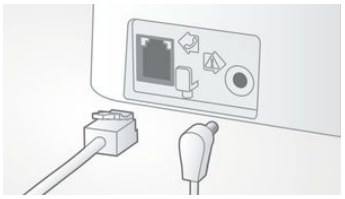
Automatic Volume Control offsets variations in sound signal, which can be caused by distance, signal strength or the caller's phone - so what you hear always remains consistent. Reducing the audio amplification for strong signals, and increasing it for weak ones, it means you can enjoy a smooth conversation without unwanted sound volume variation.

4.1cm (1.6") display



Easy to read 4.1 cm (1.6") display with amber backlight

Easy setup

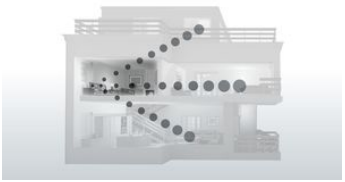


Ultimate convenience through easy set up. Simplified installation - Plug & Play product

Caller ID

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

Optimized antenna layout



Our optimized antenna layout ensures strong and stable reception – even in areas of the house where cordless transmission is difficult. Now you can take a call wherever you are in the house, and enjoy a long, uninterrupted conversation even as you walk around.

Up to 16 hours talk time

The phone can support up to 16 hours of conversation on a single charge.

Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

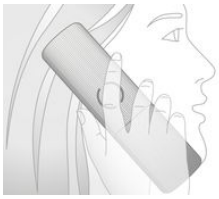
Menu in local languages

Enjoy easy set-up, navigation and control with intuitive menu available in local languages.

Programmable hot keys

Now calling the people you care about most is easier than ever. With simple one-touch dialing, you will never have to search for their number again. You can program up to 2 keys for instant calling.

Non-slip grip



The rear of the handset is treated with a special texture for added comfort and better grip.

Advanced sound testing

We test the sound quality of our DECT phones the same way as high-end headphone manufacturers do. Using an advanced ear simulator, we can accurately re-create the way people actually hear. This helps our acoustic engineers to measure and fine-tune things like frequency response, distortion and overall hearing perception, to create perfect voice reproduction.

Specifications

[field not found 'disclaimer_text']

Picture/Display

Display size	4.1cm / 1.6"
Display type	Black & White; alphanumeric
Backlight: Yes	Yes
Backlight color	Amber
